- **Reconstruction of the 20 kV MV cable loop RTP13 Vič 110/20 kV (J17) – (J09) in the area of the Faculty of Mechanical Engineering and the Faculty of Pharmacy**, project no. DFSFFA-D549/095, PZI, January 2025, designer: IBE d.d.;

Through this public procurement procedure, the contracting authority is procuring the implementation of Phase 2 of the new building of the Faculty of Pharmacy, University of Ljubljana (hereinafter also: UL FFA).

The contracting authority clarifies to tenderers that it had previously already conducted a public procurement procedure for the construction of the complete new building of the Faculty of Pharmacy, University of Ljubljana, which was unsuccessful (publication on the public procurement portal under No. JN005665/2025-EUe16/01, dated 18 July 2025).

The contracting authority then divided the construction of the new building of the Faculty of Pharmacy, University of Ljubljana, into two phases. It has already carried out the public procurement procedure for the construction, finishing and installation (GOI) works for Phase 1 of the new UL FFA building (publication on the public procurement portal under No. JN009078/2025-EUe16/01, dated 20 November 2025) and the public procurement procedure for the construction of the shared access and landscaping of UL FS and UL FFA area (publication on the public procurement portal under No. JN002767/2026-EUe16/01, dated 14 April 2026).

The contracting authority has already commenced works for Phase 1 of the new UL FFA building, comprising excavation and foundation works, installation of geothermal probes, execution of works up to level 0, including the construction of the reinforced-concrete slab above the basement in a watertight design with the installation of shelter elements, and the construction of the shared access road and landscaping of the area of the University of Ljubljana, Faculty of Mechanical Engineering (hereinafter: UL FS) and Faculty of Pharmacy.

»The present public procurement procedure does not impose any restrictions on the participation of economic operators established in third countries that have not concluded an applicable international agreement guaranteeing equal and reciprocal access to public procurement markets with the European Union. Such economic operators shall nevertheless be entitled to participate in this public procurement procedure«.

I. INVITATION TO TENDER

1. CONTRACTING AUTHORITY:

UNIVERSITY OF LJUBLJANA
Kongresni trg 12
1000 LJUBLJANA

2. SUBJECT OF THE PUBLIC CONTRACT:

The subject of this public procurement is **Phase 2 of the new building of the Faculty of Pharmacy, University of Ljubljana (hereinafter also: UL FFA), all within the scope, quality standards, and deadlines defined in the tender documentation**, and in accordance with the laws, regulations, and other provisions applicable in the Republic of Slovenia.

The works specified in this contract shall be carried out on a “unit-rate price” basis.

The content of the subject of the public contract and the technical specifications are detailed in the project documentation, inventory of GOI works and in other documents published alongside this tender documentation.

Regardless of the information contained in the tender documentation, the tenderer must, prior to submitting a bid, obtain all information relating to the subject matter of the contract under this tender documentation and that could affect the subject matter of the contract, the tender price or the tenderer's obligations. The tenderer shall not be entitled to any price increase justified by the fact that they were not informed of all the conditions and status of the subject matter of the contract.

The tenderer must offer all required works/equipment/services from the works schedule. The technical descriptions, drawings, details, diagrams and other documents in the PZI documentation provide an additional description of the items in the works schedule for construction, finishing and installation works, materials and equipment, and must be strictly adhered to in conjunction with the works schedule. If the tenderer does not complete the works schedule or the cost estimate in full (e.g. an individual item is marked with the symbol '/', the symbol '-' or is left blank) or states 0, such unfilled item shall be deemed to be free of charge or its price shall be deemed to have been already included in other items.

The project is co-financed under the Act on the provision of financial resources for investments in Slovenian healthcare in the period from 2021 to 2031 (ZZSIZS) and from the budget funds of the Ministry of Education, Science and Youth (MIZM).

The payment terms and obligations of the selected tenderer are set forth in detail in the sample public contract, which is part of this tender documentation.

1. INVITATION TO TENDER:

Pursuant to the Public Procurement Act (hereinafter: the ZJN-3), the contracting authority invites tenderers to submit their tenders for the performance of the public contract in accordance with the specified tender documentation. A tenderer may also be a group of contractors submitting a joint tender.

2. TYPE OF PROCEDURE:

The contracting authority is awarding the public contract through an open procedure in accordance with Article 40 of ZJN-3.

3. DEADLINES:

The deadlines for fulfilling all obligations under the public contract are detailed in the sample contract, which forms a part of this tender documentation.

6. DEADLINE AND METHOD OF SUBMITTING THE TENDER:

The tenderer must submit the tender via the e-JN information system at the web address <https://ejn.gov.si> in accordance with the Instructions for use of the application: TENDERERS (hereinafter: Instructions for use of e-JN), which forms a part of this tender documentation and is published at the web address:

<https://ejn.gov.si/aktualno/vec-informacij-ponudniki.html>.

Prior to submitting a tender, tenderers shall register at <https://ejn.gov.si> in accordance with the Instructions for use of e-JN. If the tenderer is already registered in the e-JN information system, they shall log in to the application at the same address.

The tenderer's user authorised to submit tenders in the e-JN information system shall submit the tender by clicking on the "Submit" button. Upon submission of a tender, the e-JN information system shall log the user's identity and the time of submission of the tender. By submitting a tender, the user demonstrates and declares their intention to submit a binding tender on behalf of the tenderer (Article 18 of the Code of Obligations). Upon submission of a tender, that tender shall be binding for the time stated in the tender, unless the tenderer's user withdraws or amends the tender before the deadline for submission.

Tenders shall be deemed to have been submitted on time if the contracting authority receives them via the e-JN system <https://ejn.gov.si> **no later than by the deadline specified in the public procurement notice**. A tender is deemed to have been submitted if it is marked with the status "SUBMITTED" in the e-JN information system.

The tenderer may withdraw or revise its tender up until the deadline for the submission of tenders. If a tenderer withdraws its tender from the e-JN information system, the tender shall be regarded as having not been submitted and the contracting authority shall not be able to view it in the e-JN system. If a tenderer amends its tender in the e-JN information system, the last submitted tender shall be available to the contracting authority in the system.

Tenders may no longer be submitted after the deadline for submission has expired.

7. INFORMATION REGARDING THE OPENING OF TENDERS:

The opening of tenders shall take place automatically within the e-JN information system at <https://ejn.gov.si>. The time and date of the opening are specified in the public procurement notice.

The opening process shall take place with the e-JN information system displaying the tenderer's details, the variants (if required or permitted) and the total tender value automatically at the time set for the public opening of tenders, and enabling access to the document that the tenderer uploads to the e-JN system under "Total tender value" in the "Cost estimate" section.

II. INSTRUCTIONS TO TENDERERS ON COMPILING A TENDER

1. The tender must be prepared in **the Slovenian language**. The value of the tender (tender value) must be expressed in **EUR (excluding and including VAT)**.
2. Tenderers must attach the tender forms, templates and statements, duly completed and signed by a legal representative or authorised person (except if expressly required that they be signed by a legal representative).

Tenderers must carefully review all documents and complete all blank spaces in the tender documentation, either in ink, ballpoint pen or by computer, using clear block capitals.

Any corrections to the tender documentation and the tender must be stamped and signed by the legal representative or an authorised person at the place of correction.

All costs in connection with the preparation and submission of the tender shall be borne by the tenderer. Under no circumstances shall the contracting authority reimburse tenderers or be liable for any costs or other damages arising from participation in the public procurement procedure, including in the event of withdrawal from the public contract in accordance with the eighth paragraph of Article 90 of the ZJN-3.

Tenderers may not alter the contracting authority's conditions and requirements set out in the tender documentation. Any changes will be deemed to constitute the tenderer's disagreement with the tender documentation and such a tender will therefore be excluded as inadmissible.

3. The public procurement procedure is conducted in accordance with the applicable Slovenian legislation and the EU legislation relating to public procurement.

The award of the public contract shall, inter alia, be carried out in accordance with the provisions of:

- *the Public Procurement Act (ZJN-3, Official Gazette of the Republic of Slovenia No. 91/15, as amended and supplemented), hereinafter referred to as the ZJN-3;*
- *the Commission Implementing Regulation (EU) 2019/1780 of 23 September 2019 establishing standard forms for the publication of notices in the field of public procurement and repealing Implementing Regulation (EU) 2015/1986 (e-forms);*
- *the Act Regulating the Implementation of the Budgets of the Republic of Slovenia for the relevant year(s);*
- *the Legal Protection in Public Procurement Procedures Act (Official Gazette of the Republic of Slovenia No. 43/11, as amended and supplemented), hereinafter referred to as the ZPVPJN;*
- *the Public Finance Act (Official Gazette of the Republic of Slovenia No. 11/11, as amended and supplemented);*

- *the Code of Obligations (OZ-UPB, Official Gazette of the Republic of Slovenia No. 97/2007, as amended and supplemented), hereinafter referred to as the OZ;*
- *the Rules on Procedures for Implementing the Budget of the Republic of Slovenia (Official Gazette of the Republic of Slovenia No. 50/07, as amended and supplemented);*
- *the Integrity and Prevention of Corruption Act (Official Gazette of the Republic of Slovenia, No. 69/11, as amended and supplemented), hereinafter referred to as the ZIntPK;*
- *the Construction Act (Official Gazette of the Republic of Slovenia No. 199/21, as amended and supplemented), hereinafter referred to as the GZ-1;*
- *the Decree on waste (Official Gazette of the Republic of Slovenia, No. 77/2022, as amended and supplemented);*
- *the Decree on the Management of Construction Waste (Official Gazette of the Republic of Slovenia, No. 34/08, as amended and supplemented);*
- *the Rules on project and other documentation and forms for the construction of buildings (Official Gazette of the Republic of Slovenia, No. 30/23);*
- *the Architecture and Civil Engineering Act (Official Gazette of the Republic of Slovenia, No. 61/17, as amended and supplemented), hereinafter referred to as the ZAID;*
- *all other applicable legislation and regulations in force in the Republic of Slovenia and the EU governing the areas to which the public contract or the subject matter of the public contract is related.*

4. Tenderers can get **information** regarding the preparation of tenders and clarifications on the tender documentation on the basis of written questions submitted via the **Public procurement portal**, which must be received no later than **the date and time specified in the contract notice**. The contracting authority will not provide clarifications for the tenderers' questions received after the set deadline. Written responses shall be published on the Public procurement portal.

Tenderers may obtain the tender documentation on the **Public procurement portal**.

Any additional explanations, supplements, information or clarifications that have not been published on the Public procurement portal shall not be binding on the contracting authority.

All documentation received may be used solely for the purposes of preparing a tender for this project or this public procurement procedure. It must not be reproduced, copied or cited in other cases.

5. Change of tender documentation:

The contracting authority shall reserve the right to change the tender documentation on its own initiative or in response to requests for clarification. In the event of major changes, the contracting authority will, if necessary, extend the deadline for the submission of tenders. After the expiry of the deadline for the receipt of tenders, the contracting authority may no longer amend or supplement the tender documentation. All changes will be published on the Public procurement portal.

6. Variant tenders:

When evaluating tenders, the contracting authority shall not take variant tenders into account.

7. Validity of the tender:

The tender must be valid **up to and including the date specified in Tender Form 3 – Tender.**

8. Amendments and withdrawal of tenders:

The tenderer may withdraw, supplement or replace the tender up until the deadline for the submission of tenders, without the contracting authority being entitled to call upon the tender bond.

After the expiry of the deadline for the submission of tenders, the tenderer may no longer amend, supplement or replace the tender submitted with a new one and the contracting authority may not accept it.

Withdrawal of a tender after the expiry of the deadline for submission of tenders and during the period of validity of the tender (as stated in the tender) shall result in the forfeiture of the tender bond, as set out in the next point of this tender documentation.

9. Financial tender bond:

The tenderer must also submit a **tender bond** to the contracting authority **by the deadline for submission of tenders**, namely:

- a) a bank guarantee or an equivalent surety bond from an insurance company with its registered office or branch in the Republic of Slovenia. The amount of the tender bond shall be at least: **EUR 750,000**. The minimum validity of the tender bond shall be until and including: 15 July 2027
or
- b) **a cash deposit of EUR 750,000**. The cash deposit must be paid into the University of Ljubljana's current account no. 01100-6030707119 opened with the Bank of Slovenia, quoting reference 401-30/2025 (tender number) and the purpose: "Cash deposit for the public contract for the New building FFA – Phase 2". The cash deposit must already be in the contracting authority's bank account at the time the deadline for the submission of tenders expires. Tenderers are asked to submit proof of payment with their tender.

A template for the financial tender bond is provided in **FORM 7a (FINANCIAL TENDER BOND)**. If a tenderer submits a financial tender bond as specified in point a) above, they must include in their tender a financial tender bond which, in terms of content and requirements, fully complies with the form. The tender bond must be drawn up in accordance with the **Uniform Rules for Demand Guarantees (URDG)**, 2010 revision, issued by the ICC under No. 758.

The financial tender bond under point a) above must be submitted in the tender as a **secure electronic document, signed with the guarantor's qualified digital certificate and allowing verification of the authenticity of the signature, or in physical form**. The latter must be delivered to the contracting authority's headquarters before the deadline for the submission of tenders.

The contracting authority shall liquidate the tender bond if the tenderer:

- unlawfully amends or withdraws their tender after the expiry of the deadline for receipt of tenders, while it remains valid;
- fails to sign the public contract as the successful tenderer, upon request and within the time limit set by the contracting authority;
- as the successful tenderer, fails to provide a performance bond in accordance with the provisions of the contract.

If a tenderer submits a cash deposit as a tender bond in accordance with point b) above, the contracting authority shall return this to an unsuccessful tenderer's current account without interest upon the expiry of the tender's validity or when the decision on the award of the public contract becomes final.

FOR INFORMATION PURPOSES ONLY

III. SELECTION OF THE MOST FAVOURABLE TENDER AND ECONOMIC OPERATORS IN THE TENDER

1. Criteria for awarding the public contract

The criterion for selecting the most favourable tenderer is the most economically advantageous tender; the contracting authority will consider the tender price as the sole criterion for the award of the public contract.

The tenderer who submits a valid tender and offers **the lowest tender price (EUR excluding VAT)** will be selected as the most favourable tenderer. If two or more admissible tenderers offer the same lowest tender price, the tenderer who submits their tender to the e-JN information system first will be selected.

The tender price is evident from the tender (Tender Form No. 3 – “TENDER”, the cost estimate and Tender Form No. 8 – “COST ESTIMATE SUMMARY (BREAKDOWN)”).

2. Tender and instructions for completing the cost estimate

The tenderer shall submit Tender Form No. 3 – “TENDER” as part of the tender, indicating the tender price.

The tenderer shall upload the completed “COST ESTIMATE SUMMARY (BREAKDOWN)” (Tender Form No. 8) to the “Cost estimate” section of the e-JN information system as a PDF file, which will be available at the public opening of tenders. In the event of any discrepancies between the data in Tender Form No. 8 (“COST ESTIMATE SUMMARY (BREAKDOWN)”) – uploaded to the “Cost estimate” section – and the full cost estimate – uploaded to the “Documents” section – or the “TENDER” form (Tender Form No. 3), the data in the full cost estimate uploaded to the “Documents” section, under “Other Annexes”, shall be deemed valid.

The tender cost estimate (Excel table) must not be amended, supplemented or annotated.

The tenderer must complete it as follows:

- for each item in the schedules, complete the column price per unit column. All prices in the works schedule are **exclusive of VAT**.

NOTE: In the works schedule, commercial names of individual products or references to manufacturers may be listed for certain items. Such product references are **not** a requirement of the contracting authority, and compliance with them is **not** binding on the tenderer. They serve merely as an example (description) of a product available on the market, the functionality and quality of materials and workmanship of which meet the contracting authority's expectations. The tenderer may offer any similar product from another manufacturer, provided that it serves its purpose equally

well and is of the same or better quality, or is at least equivalent to the product indicated as suitable in the designer's bill of quantities.

3. Information on the tenderer, joint tenders, tenders involving subcontractors and the use of capacities of other entities

For a tender to be admissible, tenderers must meet all the conditions and requirements set out in this section of the instructions.

A) The tender must clearly state the details of the tenderer and the details of the tenderers in a joint tender (Tender Form No. 1). If a group of tenderers submits a joint tender, the lead tenderer and all tenderers in the joint tender must be specified.

If the successful tenderer is represented by tenderers in a joint tender, **those same tenderers acting jointly** shall sign the contract with the contracting authority! In the case of a joint tender, all documents must be attached to the tender in accordance with point C) Joint tender.

The tender must include a **list of all subcontractors and details of the subcontractors** (Tender Form No. 1a). If tendering with subcontractors, all documents must be attached to the tender in accordance with point B) Tender with subcontractors.

The tender must clearly indicate the **details of the members of the administrative, management or supervisory bodies and persons authorised to represent, make decisions or exercise control within the tenderer (the lead tenderer and all tenderers in a joint tender) or subcontractors** (Tender Form No. 2, signed by the member or authorised representative).

B) Tender with subcontractors

A tender involving subcontractors is a tender which, in addition to the tenderer or tenderers acting jointly, also involves other contractors (hereinafter: subcontractors). A subcontractor is any economic operator, i.e. a legal or natural person, who, on behalf of the tenderer with whom the contracting authority has signed a contract for the performance of a public contract in accordance with the ZJN-3, supplies goods or provides a service or carries out construction work directly related to the subject matter of the public contract. In relation to the contracting authority, the tenderer, as the principal contractor, is fully responsible for the performance of the contract awarded, regardless of the number of subcontractors.

If the tenderer acts with subcontractors, in addition to the documents listed in Chapter IV. THE METHOD OF VERIFYING THE QUALIFICATION OF TENDERERS, the tenderer must also submit the following for each subcontractor:

- a completed form **List of all subcontractors and details of subcontractors**, including details of the work to be carried out by each subcontractor (Tender Form No. 1a)
- the European Single Procurement Document (hereinafter: the **ESPD form**)
- **the subcontractor's request for direct payment**, if the subcontractor so requests (Tender Form No. 1a and 1b)
- the SUBCONTRACTOR'S STATEMENT form, completed and signed by the subcontractor (Tender Form No. 1b)

The **tender with subcontractors** must list all subcontractors (name, full address, registration number, tax number and bank account details of the subcontractor). It must be specified which part of the public contract will be performed by the subcontractors, as well as the type and value of the work they will undertake.

If a **subcontractor requests direct payment** in accordance with Article 94 of the ZJN-3, the submitted documentation must include the subcontractor's request for direct payment, and the successful tenderer shall authorise in the contract the contracting authority to make direct payments to subcontractors on the basis of a confirmed invoice and shall make a statement that, upon issuing its own invoice, it will also attach the previously confirmed invoices of its subcontractors.

Direct payment to subcontractors shall only be deemed mandatory under the ZJN-3 if a subcontractor requests direct payment in accordance with and in the manner specified in Article 94 of the ZJN-3; this obligation shall bind the contracting authority and the principal contractor.

If direct payment to a subcontractor is not mandatory in accordance with Article 94 of the ZJN-3, the contracting authority shall require the principal contractor to send it, no later than 60 days after the payment of the final invoice or statement of account, a written statement from the principal contractor and a written statement from the subcontractor confirming that the subcontractor has received payment for the works carried out, services provided or goods supplied directly related to the subject matter of the public contract.

None of the subcontractors may be subject to grounds for exclusion. However, the tenderer may demonstrate compliance with the required conditions for cooperation with subcontractors, if so specified in Chapter IV. METHOD OF DETERMINING THE TENDERERS' QUALIFICATIONS.

If a subcontractor is replaced or if the successful tenderer enters into a contract with a new subcontractor after signing the public contract, both of which may only be done with the contracting authority's consent, the successful tenderer who has signed the contract with the contracting authority must submit the following to the latter within 5 days of the change:

- a **statement** that it has settled all undisputed liabilities to the original subcontractor;
- a **request** from the new subcontractor for direct payment, if the subcontractor so requests,
- an **authorisation for the payment** of services provided directly to the new subcontractor, if the subcontractor so requests,
- **all required documentation regarding the absence of the grounds for exclusion from this tender documentation**; if the tenderer demonstrated its qualifications regarding the conditions for participation in the tender by referring to the original subcontractor, then also documentation proving that such conditions for participation are met.

C) Where a group of tenderers submits a joint tender:

After signing the public contract with the contracting authority, the group of tenderers must **submit a legal document (contract) on joint performance of the contract**, clearly specifying the following:

- the appointment of a lead contractor for the performance of the public contract,
- the type of work to be carried out by each contractor and their respective responsibilities,
- a statement that they are familiar with the instructions to tenderers, the tender conditions and the criteria for awarding the public contract and that they fully agree with them,
- a statement that they are familiar with the payment terms from the tender documentation, and
- a statement that the tenderers shall be jointly and severally liable to the contracting authority.

If a public contract is signed with a group of tenderers, those same tenderers or contractors shall also be the signatories to such public contract.

All joint tenderers must attach the ESPD form and other documents as specified in Chapter IV. METHOD OF DETERMINING THE TENDERERS' QUALIFICATIONS.

Any of the joint tenderers may submit a financial tender bond as specified in point 9 of the previous chapter of this tender documentation.

None of the joint tenderers may be subject to grounds for exclusion. However, a tenderer may demonstrate compliance with the required conditions for participation with joint tenderers if so specified in Chapter IV. METHOD OF DETERMINING THE TENDERERS' QUALIFICATIONS.

IV. METHOD OF DETERMINING THE TENDERERS' QUALIFICATIONS

A. Grounds for exclusion (Article 75 of the ZJN-3)

	GROUND FOR EXCLUSION	EVIDENCE
1.	<u>There are no grounds for exclusion regarding the economic operator (tenderer, partner in a joint tender, subcontractor):</u> (a) neither the economic operator nor its representatives (i.e. persons who are members of the economic operator's administrative, management or supervisory body, or who are authorised for representation, decision-making or control within it) have been convicted by a final judgment for criminal offences under the Criminal Code (Official Gazette of the Republic of Slovenia, No. 50/12 – official consolidated text, 6/16 – corr., 54/15, 38/16, 27/17, 23/20, 91/20, 95/21, 186/21 and 105/22 – ZZNSPP; hereinafter: the KZ-1) as set out in the first paragraph of Article 75 of the ZJN-3, or for comparable criminal offences handed down by foreign courts, or, in the case of a final conviction, the economic operator has taken sufficient measures to demonstrate its reliability despite the existence of the relevant ground for exclusion, in accordance with the ninth paragraph and taking into account the tenth and eleventh paragraphs of Article 75 of ZJN-3; b.) the economic operator meets its mandatory contributions and other non-tax financial obligations in accordance with the law governing financial administration, which are collected by the tax authority in accordance with the regulations of the	<u>The tenderer, joint tenderers and potential subcontractors shall submit:</u> - A completed ESPD form, which the tenderer shall complete on the ESPD website – GOV.SI Portal, Part III: Grounds for exclusion. The ESPD form must be attached for each economic operator in the tender (i.e. the tenderer, a joint tenderer, a subcontractor) AND - Each representative of each economic operator (i.e. the tenderer, a joint tenderer, a subcontractor) shall submit a completed and signed Tender Form No. 2 – INFORMATION ON THE MEMBERS OF MANAGEMENT, GOVERNANCE OR SUPERVISORY BODIES AND PERSONS AUTHORISED TO REPRESENT, DECIDE OR SUPERVISE WITHIN THE TENDERER (the lead tenderer and all joint tenderers) OR SUBCONTRACTORS OR - An extract from the criminal record, which must not be older than 4 months from the deadline for submission of tenders. For an economic operator and/or representative with its registered office/permanent residence/nationality abroad, the following rule shall apply:

country in which it is established or the regulations of the contracting authority's country. An economic operator shall also be considered not to comply with its obligations as referred to in the preceding sentence if it has not submitted all the withholding tax returns for income from the employment relationship for the period of five years preceding the date of the submission of the tender or request. An economic operator shall not be excluded if, by the deadline for the submission of applications or tenders, it settles any outstanding liabilities amounting to 50 euros or more and submits all withholding tax returns for income from employment for the period of the last five years up to the deadline for the submission of the application or tender;

c.) the economic operator is not listed in the register of economic operators subject to the additional sanctions of exclusion from public procurement procedures;

d.) in the last three years prior to the deadline for the submission of tenders, the economic operator has not been fined twice by a final decision of a competent authority of the Republic of Slovenia, another Member State or a third country for an offence related to remuneration for work, working hours, rest periods, the performance of work under civil law contracts despite the existence of elements of an employment relationship or in connection with undeclared work.

NOTE: None of the economic operators participating in the tender (i.e. the tenderer, joint tenderers, subcontractors) may be subject to the above-mentioned grounds for exclusion.

In relation to the grounds for exclusion under point a) (first paragraph of Article 75 of the ZJN-3), in addition to the ESPD form and Tender Form No. 2 – "INFORMATION ON THE MEMBERS OF MANAGEMENT, GOVERNANCE OR SUPERVISORY BODIES AND PERSONS AUTHORISED TO REPRESENT, DECIDE OR SUPERVISE WITHIN THE TENDERER" (the lead tenderer and all joint tenderers) or SUBCONTRACTORS", an extract from the relevant register, such as the criminal record, must be submitted for the economic operator AND its representatives; this extract must not be older than 4 months from the deadline for submission of tenders; if such a register does not exist, an equivalent document must be issued by the competent judicial or administrative authority in the country of origin or the country in which the economic operator or the representative of the economic operator has its registered office/residence/nationality, and from which it is evident that the stated grounds for exclusion do not exist.

2.	In accordance with point f. of paragraph 6 of Article 75 of the ZJN-3, the contracting authority shall also exclude from the public procurement procedure any economic operator which, in a previous public contract or concession contract concluded with the contracting authority, demonstrated significant or persistent shortcomings in the fulfilment of a key obligation, as a result of which the contracting authority terminated the previous contract or agreement early or claimed damages, or if other comparable sanctions were imposed. NOTE: None of the economic operators participating in the tender (i.e. the tenderer, joint tenderers, subcontractors) may be subject to the above-mentioned ground for exclusion.	The contracting authority shall verify the relevant grounds for exclusion against its own records.
----	---	---

B. Conditions of participation. Economic, financial, technical and personnel conditions for the recognition of ability (Articles 76 and 77 of the ZJN-3):

	CONDITION FOR PARTICIPATION	EVIDENCE
1.	<u>The tenderer AND any partners in a joint tender meet the condition for participation:</u> The tenderer (and any partners in a joint tender) had no overdue outstanding liabilities in the last 4 months prior to the publication of this public procurement procedure. NOTE: The tenderer and all joint tenderers must meet the above condition for participation.	<u>The tenderer and any joint tenderers shall submit:</u> - A completed ESPD form (Part IV: Conditions for participation; B: Economic and financial standing) for the tenderer and each partner in a potential joint tender. <i>Note: Before awarding the public contract, the contracting authority shall ask the tenderer to whom it has decided to award the public contract to submit the following evidence or documents relating to their economic and financial capacity:</i>

		- Legal entities with registered office in the Republic of Slovenia shall submit: the S.BON-1/P form - Sole proprietors with registered office in the Republic of Slovenia: the S.BON-1 form. - Tenderers with a registered office abroad shall submit evidence containing the information required by the contracting authority as conditions for the recognition of economic and financial capacity. Evidence or certificates may not be older than 30 days from the date of opening of tenders.
2.	<u>The tenderer OR any partner in a joint tender must meet the condition for participation:</u> The tenderer OR at least one of the partners in the joint tender must demonstrate an average annual revenue of at least EUR 30,000,000.00 in 2024 and 2025. NOTE: The above condition for participation may be met by the tenderer or by any partner in a joint tender. In this respect, the revenues of partners in a joint tender shall not be aggregated, i.e. the average annual revenue of at least EUR 30,000,000.00 must be demonstrated in full by a single partner in the joint tender.	<u>The tenderer or any partner in a joint tender shall submit:</u> - A completed ESPD form (Part IV: Conditions for participation; B: Economic and financial standing). <i>Note: Before awarding the public contract, the contracting authority shall ask the tenderer to whom it has decided to award the public contract to submit the following evidence or documents relating to their economic and financial capacity:</i> - Legal entities with registered office in the Republic of Slovenia shall submit: the S.BON-1/P form - Sole proprietors with registered office in the Republic of Slovenia: the S.BON-1 form. - Tenderers with registered office abroad shall submit evidence containing the information required by the contracting authority as conditions for the recognition of economic and financial capacity. Evidence or certificates may not be older than 30 days from the date of opening of tenders.

3. <u>The tenderer OR any partners in a joint tender OR the subcontractor must meet the condition for participation:</u> The economic operator must demonstrate that, in the period from 1 January 2010 onwards, it has successfully completed one (1) comparable reference contract. A comparable reference project is defined as the execution of construction, craft and installation works ("GOI works") involving the construction of a new building or the reconstruction of at least one complex structure (Article 8 of the Decree on the Classification of Structures, Official Gazette of the Republic of Slovenia, No. 96/22) classified as an Office and Administrative Building (No. 122), Commercial Building (No. 12301), Building for Public Use (No. 126) or Industrial Building (No. 1251) according to the Classification of Types of Constructions (CC-SI) under the Decree on the Classification of Structures (Official Gazette of the Republic of Slovenia, No. 96/22), where the value of the GOI works under the reference project amounted to at least EUR 10 million, excluding VAT. The contracting authority will recognise a reference project as suitable if, for all reference projects involving new construction or reconstruction, an operating permit or another comparable decision by a foreign authority competent to issue such a decision abroad has been obtained. The contracting authority will recognise the reference project if the operating permit or other decision referred to in the preceding sentence had been obtained within the period specified above. NOTE: Compliance with the reference condition may be demonstrated by any of	<u>The tenderer OR any joint tenderer OR the subcontractor must submit a completed:</u> - ESPD form (Part IV: Conditions for participation; C: Technical and professional capacity.) - AND - Tender Form No. 4a – LIST OF THE ECONOMIC OPERATOR'S MOST IMPORTANT REFERENCES** - AND - Tender Form 4b – Certificate from the reference contracting authority** **The contracting authority reserves the right to verify the authenticity and eligibility of the reference projects listed in the tender with the reference contracting authorities. Prior to awarding the public contract, the contracting authority may require tenderers to submit other evidence demonstrating compliance with the reference condition (e.g. handover report, contract, purchase order, etc.).
---	--

	the economic operators participating in the tender (the tenderer, partners in a joint tender or a subcontractor), provided that such economic operator will perform works with a total value of at least 20% of the estimated tender value.	
4.	<u>The tenderer OR any partners in a joint tender OR the subcontractor must meet the condition for participation:</u> The economic operator must demonstrate, in respect of the proposed site manager, that: - in the period from 1 January 2010 onwards, it has acted as site manager or assistant site manager for one (1) comparable reference project. A comparable reference project is defined as the execution of construction, craft and installation works ("GOI works") involving the construction of a new building or the reconstruction of at least one complex structure (Article 8 of the Decree on the Classification of Structures, Official Gazette of the Republic of Slovenia, No. 96/22) classified as an Office and Administrative Building (No. 122), Commercial Building (No. 12301), Building for Public Use (No. 126) or Industrial Building (No. 1251) according to the Classification of Types of Constructions (CC-SI) under the Decree on the Classification of Structures (Official Gazette of the Republic of Slovenia, No. 96/22), where the value of the GOI works under the reference project amounted to at least EUR 10 million, excluding VAT. The contracting authority will recognise a reference project as suitable if an operating permit or another comparable decision by a foreign authority competent to issue such a decision abroad has been obtained for the new building or the reconstruction. The contracting	<u>The tenderer OR any joint tenderer OR the subcontractor must submit a completed:</u> - ESPD form (Part IV: Conditions for participation; C: Technical and professional capacity.) - AND - Tender Form No. 4c – STATEMENT* AND LIST OF MOST IMPORTANT REFERENCES** FOR THE SITE MANAGER** - AND - Tender Form 4d – Certificate from the reference contracting authority for the site manager or assistant site manager** <i>*The contracting authority reserves the right to ask the selected tenderer to submit appropriate evidence demonstrating fulfilment of the relevant condition (e.g. a language proficiency certificate...).</i> <i>**The contracting authority reserves the right to verify the authenticity and eligibility of the reference projects listed in the tender with the reference contracting authorities. Prior to awarding the public contract, the contracting authority may ask the tenderers to submit other evidence demonstrating the fulfilment of the reference condition (e.g. handover report, contract, purchase order, etc.).</i>

	authority will recognise the reference project if the operating permit or other decision referred to in the preceding sentence had been obtained within the period specified above. - is fluent in the Slovenian language*. * A person is considered to be fluent in the Slovenian language if they have obtained the required formal education in the Republic of Slovenia or hold a certificate issued by a duly authorised institution confirming knowledge of the Slovenian language at the B1 level in accordance with the Common European Framework of Reference for Languages – CEFR. NOTE: Compliance with the reference condition may be demonstrated by any of the economic operators participating in the tender (the tenderer, partners in a joint tender or a subcontractor), provided that such economic operator will perform the above-mentioned services under the relevant public contract.	
5.	<u>The tenderer OR any partners in a joint tender OR the subcontractor must meet the condition for participation:</u> The economic operator must demonstrate, in respect of the proposed authorised engineer/construction manager, that it has, since 1 January 2010, acted as an authorised engineer/construction manager or assistant authorised engineer/construction manager in the construction of one (1) comparable reference project. A comparable reference project is defined as the execution of construction, craft and installation works ("GOI works") involving the construction of a new building or the	<u>The tenderer OR any joint tenderer OR the subcontractor must submit a completed:</u> - ESPD form (Part IV: Conditions for participation; C: Technical and professional capacity.) Prior to awarding the public contract, the contracting authority may ask the tenderers to submit other evidence demonstrating the fulfilment of the reference condition (e.g. handover report, contract, purchase order, etc.).</i>

	The contracting authority will recognise a reference project as suitable if an operating permit or another comparable decision by a foreign authority competent to issue such a decision abroad has been obtained for the new building or the reconstruction. The contracting authority will recognise the reference project if the operating permit or other decision referred to in the preceding sentence had been obtained within the period specified above. NOTE: Compliance with the reference condition may be demonstrated by any of the economic operators participating in the tender (the tenderer, partners in a joint tender or a subcontractor), provided that such economic operator will perform those works with a total value of at least 10% of the proposed tender value.	
8.	<u>The tenderer OR any partners in a joint tender OR the subcontractor must meet the condition for participation:</u> The economic operator must demonstrate that the proposed BIM coordinator: - has participated as a BIM coordinator or as an assistant BIM coordinator within the last 10 years before the publication of this public tender in the design or construction of at least one (1) complex building with the GOI works value of at least EUR 5 million excluding VAT. The contracting authority will accept references if the building was handed over to the reference contracting authority during the period specified above (in the last 10 years before the publication of this public tender);	<u>The tenderer OR any joint tenderer OR the subcontractor must submit a completed:</u> - ESPD form (Part IV: Conditions for participation; C: Technical and professional capacity.) AND - Tender Form No. 4k – STATEMENT* AND LIST OF MOST IMPORTANT REFERENCES** FOR THE BIM COORDINATOR AND - Tender Form 4l – Certificate from the reference contracting authority for the BIM Coordinator or the assistant BIM coordinator** <i>*The contracting authority reserves the right to ask the selected tenderer to submit</i>

	- holds at least a Bologna first-cycle degree in a technical field. NOTE: Compliance with the reference condition may be demonstrated by any of the economic operators participating in the tender (the tenderer, partners in a joint tender or a subcontractor), provided that such economic operator will also perform the works of this type.	<i>appropriate evidence demonstrating fulfilment of the relevant condition (e.g. certificates of education and training...).</i> <i>**The contracting authority reserves the right to verify the authenticity and eligibility of the reference projects listed in the tender with the reference contracting authorities. Prior to awarding the public contract, the contracting authority may ask the tenderers to submit other evidence demonstrating the fulfilment of the reference condition (e.g. handover report, contract, purchase order, etc.).</i>
--	---	--

C. Fulfilment of other conditions/requirements of the contracting authority:

	CONDITION/REQUIREMENT OF THE CONTRACTING AUTHORITY	EVIDENCE
1.	<u>The tenderer AND any partners in a joint tender AND the subcontractor must meet the following condition:</u> Statement by the economic operator (i.e. the tenderer and any joint tenderers, as well as all subcontractors) that it is not in any of the situations listed below, as defined in the first paragraph of Article 5k of COUNCIL REGULATION (EU) 2022/576 of 8 April 2022 amending Regulation (EU) No. 833/2014 concerning restrictive measures in view of Russia's actions destabilising the situation in Ukraine: a) a Russian national or a natural or legal person, entity or body established in Russia; b) legal persons, entities or bodies in which an entity referred to in point a) holds, directly or indirectly, a shareholding of more than 50%; or c) natural or legal persons, entities or bodies acting on behalf of or upon the	<u>The tenderer AND any joint tenderers AND the subcontractor shall submit the completed:</u> Tender Form No. 5 – STATEMENT OF THE ECONOMIC OPERATOR

	instructions of an entity referred to in point a) or b), d) a subcontractor, supplier or entity whose capacities are used within the meaning of the public procurement directives, representing more than 10% of the contract value. NOTE: None of the economic operators participating in the tender (i.e. the tenderer, joint tenderers, subcontractors) may be subject to the above-mentioned circumstance.	
2.	The tenderer offers equipment or services that meet all the technical specifications and other requirements of the contracting authority set out in this tender documentation, including the specifications and requirements specified in the project documentation and the works schedule.	The contracting authority reserves the right to subsequently ask the tenderer to submit brochures and technical specifications for the equipment/services offered. In any event it may ask the successful tenderer to submit samples or technical specifications indicated in the public contract after the contract has been signed.

V. OTHER CONDITIONS, NOTICES AND RIGHTS

1. The contracting authority hereby warns the tenderer:
 - that it must not initiate or carry out any actions that would predetermine the selection of a particular tender during the public procurement procedure,
 - that it may not initiate activities that could result in the contract not entering into force or not being completed in the period from the selection of the tenderer to the entry into force of the contract;
 - that neither party may initiate or carry out procedures that would hinder the annulment or amendment of the decision on the selection of the contractor or affect the impartiality of the review committee,
 - that, in accordance with Article 35 of the ZJN-3, the specification of the supplies, services or works tendered and the quantities indicated in the specification, the price per unit, the value of individual items and the total tender value, and all data that affected the tender classification under other criteria shall be public information; therefore, the contracting authority will not take into account any indication by the tenderer that the cited information constitutes a trade secret,
 - that the tenderer must indicate in their tender which parts of the tender constitute a trade secret; the contracting authority will not take into account any subsequent indications,
 - prior to the conclusion of a public contract with a value exceeding EUR 10,000 excluding VAT, the successful tenderer must submit to the contracting authority a statement or information regarding the participation of natural and legal persons in the ownership of the successful tenderer, including the participation of silent partners, and on economic operators which, in accordance with the provisions of the law governing companies, are deemed to be companies related to the selected tenderer, as provided for in the sixth paragraph of Article 14 of the Integrity and Prevention of Corruption Act (ZIntPK). The same applies to tenderers in a joint tender and subcontractors requiring direct payment. For natural persons, the statement shall contain the first name and surname, residential address and share of ownership. If the successful tenderer submits a false statement or provides untrue information regarding the above-mentioned facts, this shall result in the nullity of the public contract.
2. If the successful tenderer fails to respond to the contracting authority's invitation to sign the contract within 8 days, the successful tenderer shall be deemed to have withdrawn from the tender. In such case, the contracting authority shall redeem the financial tender bond regardless of the reasons for the withdrawal from the tender.
3. The successful tenderer shall not be entitled to claim subsequent price increases on the grounds of incomplete or inadequate tender documentation for the parts of the public contract that were inadequately defined in the tender documentation, which the successful tenderer could have foreseen considering the subject matter of the public contract and the entire documentation.
4. The contracting authority reserves the right **in accordance with Article 90 of the ZJN-3 to suspend the public procurement procedure, reject all tenders or withdraw from the execution of the public contract.** The contracting authority also reserves the right to sign a contract for a reduced scope of the subject matter of the contract or not to conclude a contract with any tenderer, all without any obligation to reimburse costs or other damages to tenderers. By submitting a tender, tenderers expressly agree to the above.
5. A request for legal protection in public procurement procedures may be filed against any action taken by the contracting authority in the public procurement procedure, unless otherwise

provided for in the Public Procurement Act (ZJN-3) or the Legal Protection in Public Procurement Procedures Act (ZPVPJN). A request for review shall be filed within the time limit specified in Article 25 of the ZPVPJN.

The applicant shall submit the request for review via the eRevizija portal (<https://www.portalerevizija.si/>). An applicant for a review relating to the content of the notice, the invitation to tender or the tender documentation must pay a fee of EUR 4,000.00 before submitting the application. The applicant must attach a confirmation of payment of the fee to the application for review.

The fee for the pre-review and review procedure must be paid by the applicant into the current account of the Ministry of Finance, number SI56 0110 0100 0358 802, held at the Bank of Slovenia, Slovenska 35, 1505 Ljubljana, Slovenia, SWIFT CODE: BSLJSI2X; IBAN: SI56011001000358802 – fee for the public procurement review procedure.

The reference number in accordance with Model 11 shall be used for the payment of fees. The reference number consists of three parts of data (P1 – P2 – P3). The first and second parts of the reference, P1 and P2, are always the same and are separated by a hyphen, where the value of P1 is 16110 and the value of P2 is 7111290. The last, third part of the reference, P3, represents the publication number of the public procurement notice on the Public procurement portal. It consists of 8 digits, with the first six digits representing the publication number of the public procurement notice and the last two digits representing the year from the publication number of the public procurement notice.

VI. TENDER FORMS AND SAMPLES

FOR INFORMATION PURPOSES ONLY

DATA ON THE TENDERER AND ANY JOINT TENDERERS

(Instruction: if there are a large number of tenderers, the above table or form shall be copied in the required number of copies.)

a) TENDERER OR LEAD TENDERER (in the case of a joint tender):

Name of the tenderer	
Address and registered office of the tenderer	
All legal representatives or authorised persons	
Contact person	
Telephone	
Email	
Transaction account of the company	
Company registration number	
VAT ID number	

b) THE FOLLOWING TENDERERS WILL PARTICIPATE JOINTLY IN THE PUBLIC CONTRACT:

1. Joint tenderer:

Name of the joint tenderer:	
Address and registered office of the joint tenderer	
All legal representatives or authorised persons	
Contact person	
Telephone	
Email	
Transaction account of the company	

Company registration number	
VAT ID number	
Type of works to be performed	
Value of works to be performed (EUR excluding VAT)	

2. Joint tenderer:

Name of the joint tenderer:	
Address and registered office of the joint tenderer	
All legal representatives or authorised persons	
Contact person	
Telephone	
Email	
Transaction account of the company	
Company registration number	
VAT ID number	
Type of works to be performed	
Value of works to be performed (EUR excluding VAT)	

Date:

Signature of the tenderer/lead
tenderer in a joint tender:

Note: It is desirable that the tenderer attach certificates of no conviction for the tenderer/joint tenderer.

LIST OF ALL SUBCONTRACTORS AND DATA ON SUBCONTRACTORS

(Instruction: This form is to be completed only if the tenderer is acting with subcontractors. In the event of a large number of subcontractors, the form should be adapted or copied and attached in multiple copies)

THE FOLLOWING SUBCONTRACTORS WILL PARTICIPATE IN THE EXECUTION OF THE PUBLIC CONTRACT:

Name of subcontractor	
Address and registered office of the subcontractor	
All legal representatives or authorised persons	
Contact person	
Telephone	
Email	
Transaction account of the company	
Company registration number	
VAT ID number	
Type of works to be performed	
Value of works to be performed (EUR excluding VAT)	
The subcontractor requests direct payment (mark as appropriate)	YES / NO

Date:

Subcontractor's signature:

Note: It is desirable that the tenderer attach the subcontractor's certificates confirming the absence of any criminal record.

STATEMENT OF THE SUBCONTRACTOR

SUBCONTRACTOR:

(name)

(address)

I, the undersigned subcontractor, hereby state that:

- we are familiar with the instructions, the tenderer and the tender conditions, as well as the criteria for the award of the public contract, and that we fully agree with them;
- we are familiar with the payment terms set out in the tender documentation;
- in the event that we request direct payment, we give the contracting authority our consent to settle our claim against the principal contractor, under the terms set out in this tender documentation, to us instead of to the principal contractor, for the works performed in relation to the subject of the public contract.

Date:

Subcontractor's signature:

DATA ON THE MEMBERS OF MANAGEMENT, GOVERNANCE OR SUPERVISORY BODIES AND PERSONS AUTHORISED TO REPRESENT, DECIDE FOR OR SUPERVISE THE TENDERER (the lead tenderer and all joint tenderers) or SUBCONTRACTORS

(Instructions: make copies of the form for the required number of all members of the management, governance or supervisory bodies and persons authorised to represent, decide for or supervise all economic operators participating in the tender)

First name and surname	
Date of birth	
EMŠO (personal identification number)	
Place of birth	
Municipality of birth	
Country of birth	
Permanent/temporary address (street and house number, post office and postcode)	
Nationality	

By signing this document, I authorise the contracting authority, UNIVERSITY OF LJUBLJANA, Kongresni trg 12, 1000 Ljubljana, to obtain, for the purposes of the public procurement procedure **“New building of UL FFA – Phase 2”**, based on the personal data provided above, a Certificate from the criminal record for natural persons from the Ministry of Justice or via the e-Dosje information system, that will not be older than 4 months before the deadline for submitting tenders.

Date:

Signature of the above-mentioned natural person:

Note: It is desirable that the tenderer attach with the tender the certificates confirming the absence of any criminal record for the members of the management, governance or supervisory bodies and persons authorised to represent, decide for or supervise the tenderer, the joint tenderer and the subcontractor.

TENDER No.: _____

TENDERER: _____

1. In accordance with the tender conditions and the tender documentation, we are willing to carry out the public contract **New Building of UL FFA – Phase 2** for the following price on “unit-rate price” basis:

Estimated value of the contractual works based on the tender cost estimate

EUR

Discount

EUR

Value excluding VAT

EUR

+ VAT 22%

EUR

ESTIMATED TENDER PRICE

EUR

(in words: _____ euros and ____/100)

2. Validity of the tender: up to and including **27 May 2027**, with the possibility of extension at the contracting authority's request.
3. By submitting the tender, we confirm that we are familiar with the sample contract and agree with its content, and that we will carry out the works under the terms and conditions set out in the sample contract.

4. We declare that, in carrying out the construction, we will comply with the requirements of the contracting authority set out in the designs and other documentation relating to the award of the public contract, in a manner that will ensure the award of a gold certificate under the DGNB sustainable construction certification system.
5. We hereby state that the tender estimate, which forms part of our tender No. __, dated __/__/____ (hereinafter referred to as: our tender cost estimate), has not been altered in the description of items, quantities or in any other part, or in any other way, except for the completion of the tender prices;
6. We hereby state that we accept full responsibility should it be established that our tender cost estimate is not completely and entirely identical to the sample tender cost estimate.
7. We expressly declare that if, only after the contract for the performance of the public contract in question has been signed, it is found that our tender estimate is not completely and entirely identical to the model tender estimate published by the contracting authority (except in respect of the completion of prices and specification of the offered product/model), any discrepancies in our tender estimate shall be treated as typographical errors and, consequently, the tender prices in our tender estimate shall apply in accordance with the items of the tender estimate published by the contracting authority.

LIST OF THE ECONOMIC OPERATOR'S MOST IMPORTANT REFERENCES

ECONOMIC OPERATOR

We hereby state that, from 1 January 2010 onwards, we have successfully completed at least one comparable reference project, where a comparable reference project is defined as the execution of construction, craft and installation works ("GOI works") involving the construction of a new building or the reconstruction of at least one complex structure (Article 8 of the Decree on the Classification of Structures, Official Gazette of the Republic of Slovenia, No. 96/22) classified as an Office and Administrative Building (No. 122), Commercial Building (No. 12301), Building for Public Use (No. 126) or Industrial Building (No. 1251) according to the Classification of Types of Constructions (CC-SI) under the Decree on the Classification of Structures (Official Gazette of the Republic of Slovenia, No. 96/22) for which an operating permit has been obtained for the building, or another comparable decision from a foreign authority competent to issue such a decision abroad, namely:

Reference contracting authority*	Value of GOI works for the reference project (EUR exclusive of VAT)	The tenderer to mark as appropriate (in case the structures within the reference project have different classifications, the tenderer shall circle multiple options)	Date of the operating permit/other comparable decision	Contact details of the reference contracting authority (first name, surname and email)
		a) Office and Administrative Building (No. 122) b) Commercial Building (No. 12301)		

		c) Building for Public Use (No. 126) d) Industrial Building (No. 1251)	
--	--	---	--

* The contracting authority is considered to be the investor or the user of the building.

Date:

Signature of the economic operator:

FOR INFORMATION PURPOSES ONLY

(Instructions: copy the form if necessary for a large number of references and/or references cited by several economic operators in the tender)

CERTIFICATE OF A REFERENCE CONTRACTING AUTHORITY

Reference contracting authority: _____

issues this reference certificate of satisfactory work, by which it declares that the economic operator listed below has successfully performed the work listed below (i.e. in terms of time, quantity and quality in accordance with the contract, the agreement and the applicable regulations).

Economic operator that carried out the reference contract: _____

Name or description of the reference contract:

Execution of construction, finishing and installation works ("GOI works"), involving the construction of a new building or the reconstruction of at least one complex structure (Article 8 of the Decree on the Classification of Structures, Official Gazette of the Republic of Slovenia, No. 96/22) classified as an Office and Administrative Building (No. 122), Commercial Building (No. 12301), Building for Public Use (No. 126) or Industrial Building (No. 1251) according to the Classification of Types of Constructions (CC-SI) under the Decree on the Classification of Structures (Official Gazette of the Republic of Slovenia, No. 96/22), where the value of the GOI works amounted to EUR _____ excluding VAT, whereby the structure represents *(to be circled only where the structure corresponds to one of the options listed below)*:

- a) Office and Administrative Building (No. 122) according to the Classification of the types of constructions (CC-SI) – Decree on the classification of structures (Official Gazette of the Republic of Slovenia, No. 96/22)
- b) Commercial Building (No. 12301) according to the Classification of the types of constructions (CC-SI) – Decree on the classification of structures (Official Gazette of the Republic of Slovenia, No. 96/22)
- c) Building for Public Use (No. 126) according to the Classification of the types of constructions (CC-SI) – Decree on the classification of structures (Official Gazette of the Republic of Slovenia, No. 96/22)
- d) Industrial Building (No. 1251) according to the Classification of the types of constructions (CC-SI) – Decree on the classification of structures (Official Gazette of the Republic of Slovenia, No. 96/22)

An operating permit has been obtained for the building, or another comparable decision has been

obtained from a foreign authority competent to issue such a decision abroad, namely on _____
(indicate the date).

transaction account no.:
(hereinafter: the contractor)

(hereinafter jointly referred to as: the contracting parties)

hereby enter into the following

CONSTRUCTION CONTRACT No. _____

for the

“New building UL FFA – Phase 2”

I. WHEREAS

Article 1

Based on the conducted public procurement procedure (publication on the public procurement portal, ref. no. _____, dated _____ 2026, and in the Official Journal of the European Union, ref. no. _____; hereinafter: the public procurement), the contractor was selected as the most advantageous admissible tenderer for Phase 2 of **the execution of new building of the Faculty of**

Pharmacy, University of Ljubljana (hereinafter also: UL FFA). Accordingly, under this contract, the contracting authority orders, and the contractor undertakes to perform, the works that are the subject of this public procurement.

II. SUBJECT OF THE CONTRACT

Article 2

The subject of this contract comprises construction and other ancillary works related to Phase 2 of the new UL FFA building, in accordance with the tender documentation for the public contract, the provisions of the Building Act (Official Gazette of the Republic of Slovenia, No. 199/21 as amended; hereinafter: GZ-1), and in accordance with other regulations applicable in the Republic of Slovenia.

The subject of the contractor's contractual obligation also includes active cooperation and coordination with other contractors, subcontractors and all other participants who will carry out or participate in the execution of works in Phase 1 of the construction of the new UL FFA building, the construction of the shared access and landscaping of the area of the University of Ljubljana, Faculty of Mechanical Engineering and Faculty of Pharmacy, as specified in Article 9 of this Contract, as well as in the execution of works relating to the supply and installation of technological equipment, furniture and multimedia equipment, and with other works contractors and equipment suppliers, as defined in more detail in the Special Technical Conditions document. The said contractual obligation is already included in the contractually agreed price, whereby, by signing this contract, the contractor expressly declares that the price in this part has been submitted on the basis of a calculation with an express guarantee as to its correctness, in accordance with the first paragraph of Article 643 of the Code of Obligations (hereinafter: OZ).

The contractual works shall be carried out so as to ensure the award of a gold certificate under the DGNB sustainable construction certification system. Only materials that do not adversely affect human health or the environment shall be used for the construction. For this purpose, the tender annex "Requirements for ENV1.2 – DGNB Table" shall be used.

The contractor undertakes to carry out the contractual works in accordance with:

- the tender documentation and its annexes;
- **the Documentation for obtaining opinions and a building permit (DGD)**, Faculty of Pharmacy, project no. 176/2021, designers Arhema d.o.o. and Atelierarhitekti d.o.o., Shared access and landscaping of the Faculty of Mechanical Engineering and Faculty of Pharmacy area, project no. 362-20, designers IBE d.d. and SADAR + VUGA d.o.o, Faculty of Mechanical Engineering, project no. 362-19, designers IBE d.d. and SADAR + VUGA d.o.o;
- **the Environmental Impact Report** no. 100123-11523, GIGA-R d.o.o. and E-NET OKOLJE d.o.o.;

- **the integral building permit** no. 35105-53/2023-2550-71 dated 16 July 2024 (final 20 September 2024), issued by the Ministry of Natural Resources and Spatial Planning, Republic of Slovenia;
- **the detailed design documents (PZI) for the new UL FFA building**, Project No. 176/2021, October 2024, clean copy July 2026;
- **the tender documentation (DZR) for the new building of UL FFA – Phase 2**, No. 176/2021, July 2026;
- **special technical conditions with annex (ENV1.2 requirements, DGNB Table)**, August 2026;
- **shallow geothermal energy extraction study for FFA**, Study No. 3018595, January 2023, IRGO Consulting d.o.o.;
- **the list of key cost elements**;
- the textual descriptions of works from the tender documentation;
- the contractor's tender no. _____, dated _____;
- the regulations, standards, technical specifications and other legislation applicable to works of this type.

The following documentation must also be taken into account when carrying out the contractual works:

- **Relocation of the S1000 gas pipeline in the OPPN65 area – Biotechnical Centre**, project no. S 1000/22428, PZI, April 2024, designer: Energetika Ljubljana d.o.o.;
- **Expansion of the public section of the DN150 water supply system for the connection to the Faculty of Mechanical Engineering and the Faculty of Pharmacy**, project no. KFSFFA-D549/095, PZI, June 2025, designer: IBE d.d.;
- **Reconstruction of the 20 kV MV cable loop RTP13 Vič 110/20 kV (J17) – (J09) in the area of the Faculty of Mechanical Engineering and the Faculty of Pharmacy**, project no. DFSFFA-D549/095, PZI, January 2025, designer: IBE d.d.;

III. DEADLINES

Article 3

The contractor undertakes to commence the works that are the subject of this contract within eight days of receiving the contracting authority's written notice and to complete them no later than 15 March 2030, whereby the contractor must submit the documentation required for the successful conduct of the technical inspection no later than 31 July 2029 inclusive. The anticipated commencement of the works is March 2027.

Within 10 working days of the conclusion of this contract, the contractor shall prepare and submit to the contracting authority a draft schedule, which must take into account all key milestones and the completion of all works. The deadline for the completion of all works under this contract is fixed and cannot be changed. In the draft schedule, the contractor must particularly highlight the critical deadlines. In addition to the schedule, the contractor shall, within 10 working days, also submit to the contracting authority the anticipated financial plan and the labour and machinery plan, which must be mutually aligned and consistent with the schedule for the execution of the works, and must be approved by the contracting authority.

The following key milestones (interim deadlines) must be taken into account in the draft schedule:

- within 8 months of signing the contract, works shall be completed at least up to the finalisation of all reinforced concrete works on the Infrastructure Centre section of the building;
- within 10 months of signing the contract, a façade mock-up shall be installed on a section of the facility;
- within 16 months of signing the contract, works shall be completed at least up to the finalisation of all reinforced concrete works for the entire building;
- within 24 months of signing the contract, works shall be completed at least up to the finalisation of the roof and façade works for the entire building envelope;
- by the end of February 2029, both transformer substations must be completed, handed over and accepted. By the same deadline, the technical inspection of both transformer substations must also have been successfully completed.
- by the end of April 2029, all construction, craft and installation works ("GOI works") within the Infrastructure Centre premises shall have been completed, including all measurements, tests and the preparation of the relevant documentation required for the technical inspection.
- by the end of April 2029, at least one freight elevator within the Infrastructure Centre shall be installed, operational and available for use by other equipment suppliers as well.
- by the end of May 2029, the conditions must be in place for the commencement of installation of the equipment required for the successful completion of the technical inspection, at least:
 - a) in both large lecture halls on the ground floor; and b) on the entire first floor or the entire second floor of the building. All remaining spaces must be ready for the installation of equipment no later than by the end of June 2029;
- by the end of April 2029, at least one goods lift shall be available and operational in the main building, and also accessible to other equipment suppliers;
- by the end of February 2029, both transformer stations shall be handed over and accepted. The technical inspection of the transformer stations must also be successfully completed by this deadline;
- submission of the documentation required for the technical inspection by 31 July 2029 inclusive;

- completion of the technical inspection of the entire building no later than by 15 September 2029;
- remedying of the deficiencies identified during the technical inspection no later than within 30 days after the technical inspection has been completed;
- obtaining the operating permit by 30 November 2029;
- ensuring conditions for the quality inspection within 15 days of obtaining the operating permit;
- remedying of the deficiencies identified during the quality inspections within 60 days of obtaining the operating permit;
- after the deficiencies identified during the quality inspections have been remedied, a further 45 days shall be allowed for the handover of the building.

Once approved by the contracting authority, the contractor must further detail the agreed draft schedule and submit it to the contracting authority no later than 20 days after the approval.

To manage and update the schedule, the contractor must provide an operational project manager or execution planner who participates in coordination meetings and updates the schedule, which must be approved by the contracting authority each time.

The schedule must be prepared in Microsoft Project or an equivalent tool that allows export to PDF and an exchangeable electronic format.

All works under the contract shall be deemed to have been completed upon the successful handover and acceptance of the building or the completion of all works in accordance with Article 15 of this contract.

Deadlines may be changed in the event of force majeure (for the duration of the force majeure), and the changed deadlines must be approved by the contracting authority, or they may be changed at the contracting authority's express written request.

The contractor must notify the contracting authority in writing immediately upon the occurrence of any grounds for an extension of the contractual deadline. Otherwise, the contractor shall not be entitled to an extension of the contractual deadline. Any changes to the contractual deadline shall be agreed between the contracting authority and the contractor by means of an annex to the contract.

IV. PRICE

Article 4

The value of contractual works is agreed based on the "unit-rate price" price clause and amounts to:

***Estimated value of the contractual
works based on the tender cost
estimate***

EUR

Discount _____ EUR

Value excluding VAT _____ EUR

+ VAT 22% _____ EUR

ESTIMATED CONTRACT PRICE _____ EUR

(in words: _____ euros and ____/100)

The above-stated estimated Contract Price has been established based on the »unit – rate price« pricing mechanism, whereby the unit rates specified in the Bill of Quantities shall remain fixed and non-adjustable until the completion of all Contract Works in accordance with Article 3 of this Contract.

The overall contractual discount specified above shall also apply to the unit rates and shall be deemed a discount applicable to each individual bill-of-quantity item.

Value added tax shall be charged and paid by the contracting authority in accordance with Article 76a of the Value Added Tax Act.

Article 4a

Within 60 days of signing the contract, the contractor shall submit to the contracting authority a price list of cost elements, which must include at least the elements from the List of key cost elements attached as annex to the tender documentation. If the contractor fails, through its own fault, to submit an appropriate price list of key cost elements (i.e. in compliance with the requirements of the tender documentation and the contracting authority) within the specified period, the contracting authority shall be entitled to charge the contractor a contractual penalty amounting to 0.5‰ of the total value of the contractual works (including VAT) for each day of delay. The total amount of the contractual penalty in this respect may not exceed 5% (five per cent) of the estimated Contract Price including VAT from Article 4 of this Contract.

If the contracting authority incurs costs and damages exceeding the contractual penalty due to a delay in the submission of the relevant price list of cost elements, the contractor shall be obliged to pay all costs incurred and the full amount of damage in addition to contractual penalty. The contracting authority may also liquidate the financial performance bond to recover the contractual penalty, the costs and damages incurred. Furthermore, the contracting authority may recover the contractual penalty from the funds withheld in accordance with this contract.

Article 5

The unit rates are set out in greater detail in the Contractor's Bill of Quantities, which forms an integral part of this Contract. Each unit rate shall be deemed to include all costs necessary for the execution of the agreed Works as defined in the tender documentation and other relevant documentation. The unit rates shall further include all associated costs of materials, labour, transportation, the use of machinery and equipment, temporary works and facilities, protective and safety measures, quality control, and all other direct and indirect costs necessary for the complete, proper, and timely execution of the agreed Works, including all ancillary works and related costs required for their full completion.

Article 6

The contractor hereby expressly confirms that it is familiar with both the building and the technical specifications according to which it will perform the works, and waives in advance any claim arising from unforeseen working conditions, incomplete and/or inadequate documentation, and undertakes to remedy such deficiencies at its own expense and in a manner to be agreed in advance with the contracting authority, without this affecting the deadline, the quality of the materials used or works performed, or the functionality of individual parts or the building as a whole.

V. INVOICING AND PAYMENTS

Article 7

The contractor shall invoice the works performed by issuing interim monthly statements for all works carried out in the previous month.

The contractor shall be entitled to include 90% of the value of the works carried out in each interim statement. The remaining 10% of the value of the works carried out shall be included in the final statement of account, which the contractor shall submit to the contracting authority in line with this contract.

In order to determine the actual monthly quantity of works executed, the contractor shall, prior to the issuance of each monthly interim payment certificate and no later than the 25th day of the month, submit the measurement book, which shall be approved by the contracting authority's supervising body by the 30th day of the month within the scope of the calculated stage of completion of the works (taking into account all works, tasks, and costs included in the unit prices, in accordance with the measurement book). The billing period runs from the first to the last day of the month.

The contractor shall deliver each statement, together with invoices or statements from its subcontractors confirmed by the contractor, to the contracting authority's supervisor in one hard copy and one electronic copy by the 5th day of the month for the preceding month at the latest.

Should the contracting authority have any comments on the statement received, it shall be obliged to confirm the undisputed part of the statement within 10 working days of receipt and to adopt a final decision on the disputed part by the next statement.

The contracting authority shall pay undisputed interim statements within 30 days of official receipt of the interim monthly statements confirmed by the supervisor.

If, through its own fault, the contractor is late in performing works according to the schedule, the contracting authority shall be entitled to withhold payment in the amount of 1.5‰ (one point five per mille) per day of delay from the total value of the contractual works (including VAT). This amount shall be paid to the contractor upon payment of the next interim statement if the contractor has rectified or made up the delay by that time, as confirmed by the contracting authority's supervisor.

Article 8

The contractor shall submit the final payment certificate within 5 working days following the approval of the final account of the works and the provision of the financial security for the rectification of defects during the warranty period.

The successful completion of the quality inspection, the technical inspection, and obtaining the use permit for works executed under the building permit constitute a necessary, but not sufficient, condition for the finalisation of the final account.

Prior to signing the handover protocol as a prerequisite for the final account, the contractor and the contracting authority's supervising engineer shall carry out a final quality inspection of all executed works, document any defective works in the inspection report, and set a deadline for the rectification of all defects. The contractor must rectify all such defects within the deadline set by the contracting authority. Once the defects have been rectified and the contracting authority confirms that the quality inspection and the rectification of all defects have been duly completed, the signatories shall proceed with the handover and the preparation of the final account.

If the contractor fails to rectify the defects or does not rectify them by the deadline agreed in the previous paragraph, the contracting authority or another contractor acting on behalf of the contracting authority may also do so at the contractor's expense and deduct such costs from the final account.

The contracting authority shall pay the final statement within 30 days of the official receipt of the e-invoice, which has been previously approved by the supervisor.

VI. OTHER MUTUAL OBLIGATIONS

Article 9

The contractor undertakes, at its own expense, which is included in the contract price, to execute all required works and also fulfil the following obligations:

- the contractor must perform the contractually agreed work conscientiously, honestly and in accordance with this contract, the final integral building permit, the complete project and

technical documentation, works schedule, reports, detailed designs, studies and the applicable legislation, including the related implementing acts, regulations, technical guidelines, standards and norms, professional rules and good construction practice;

- as security for the due performance of the contractual obligations, the Contractor shall, within twenty (20) days of the execution of this Contract, provide the Contracting Authority with a first-demand bank guarantee or insurance bond issued by a bank or insurance company having its registered office or a branch in the Republic of Slovenia, in the amount of 5% of the estimated Contract Price (including VAT). The guarantee shall remain valid at least until the final deadline for the performance of all obligations under this Contract as specified in the first paragraph of Article 3 hereof, plus an additional sixty (60) days, and shall be extendable until the submission of the financial security for the rectification of defects notified during the warranty period. Should the final deadline for the performance of all contractual obligations be extended, the Contractor shall, prior to the expiry of the existing security instrument, ensure a corresponding extension of the validity of such financial security. The Contracting Authority shall be entitled to call upon and enforce the said security in the event that the Contractor fails to perform the Works in a proper and professional manner, within the agreed time limits, and/or in accordance with the tender documentation, the design documentation and the applicable regulations, as well as in any other cases provided for under this Contract

- The Contractor shall maintain, until the final deadline for the performance of all obligations under this Contract and for an additional sixty (60) days thereafter, insurance coverage for liability for damage in accordance with the provisions of Article 16 of the Building Act (GZ-1), in an amount of not less than 10% of the estimated Contract Price (including VAT) referred to in Article 4 of this Contract. The Contractor shall evidence such insurance coverage by submitting a copy of the insurance policy within twenty (20) days of the execution of this Contract. Where the submitted insurance policy does not remain valid until the final deadline for the performance of all contractual obligations and the additional sixty (60) days thereafter, the Contractor shall ensure successive extensions of the validity of the insurance policy so that it remains continuously in force until the expiry of such period.

- Prior to the submission of the Final Payment Certificate, the Contractor shall provide the Contracting Authority with a first-demand bank guarantee or insurance bond issued by a bank or insurance company having its registered office or a branch in the Republic of Slovenia, in the amount of 5% of the Final Contract Price (including VAT), as security for the rectification of defects during the warranty period. The guarantee shall remain valid for a period exceeding the warranty period stipulated under this Contract by forty-five (45) days and shall provide for the possibility of extension. In lieu of a single financial security instrument, the Contractor may submit two or more successive financial security instruments with shorter validity periods, provided that each replacement instrument is submitted no later than thirty (30) days prior to the expiry of the preceding instrument and fully replaces it. The validity period of the first financial security instrument shall be

not less than five (5) years and thirty (30) days. The Contractor may also submit separate financial security instruments securing different obligations under Article 13 of this Contract, namely: one financial security instrument covering the obligations referred to in points (a), (b) and (c) of Article 13, one financial security instrument covering the obligations referred to in point (d) of Article 13, and one financial security instrument covering the obligations referred to in point (e) of Article 13. In such case, the validity period of the first financial security instrument referred to in the preceding sentence shall be not less than five (5) years and thirty (30) days. The Contracting Authority shall be entitled to call upon and enforce the said security in the event that the Contractor fails to remedy defects, or fails to remedy them within the agreed time limits, as well as in any other cases provided for under this Contract.

- the contractor must do everything within the scope of the obligations undertaken to ensure that the deadlines agreed under this contract are met;
- the contractor shall execute the contractual works throughout all daylight hours (at least from Monday to Saturday), on all days during the contractual relationship, except on non-working days and public holidays in the Republic of Slovenia that are non-working days. Daylight hours are defined by the full hours specified in the table of working hours. Notwithstanding this, the contractor undertakes to execute works outside these time frames as well, where necessary or due to the nature of specific works, provided that natural, technical, safety, and other relevant circumstances as well as applicable regulations so permit.

*Table of working hours

Season of the year	Full day hours
1 January – 19 February	8:00 – 17:00 h
20 February – 8 March	7:00 – 17:00 h
9 March – 23 April	7:00 – 18:00 h
24 April – 30 September	6:00 – 19:00 h
1 October – 13 November	7:00 – 17:00 h
14 November – 31 December	8:00 – 17:00 h

- the construction manager, who is simultaneously the site manager, and a chartered engineer/works manager in the field of civil, mechanical, or electrical engineering must be continuously present on site, depending on the specific type of works being executed on site. Attendance records shall be kept in the site logbook or through other electronic records. Should the contractor violate its contractual obligation hereunder (e.g. absence of the required personnel despite the contracting authority's request for their presence), the contracting authority shall be entitled to charge a contractual penalty in the amount

of EUR 500 per person for each violation. The total amount of contractual penalties under this provision may not exceed EUR 300,000.00. Should the contractor fail to pay the contractual penalty by the set deadline, the contracting authority may liquidate the performance bond;

- the contractor's personnel specified in Article 17 of the contract shall be present at coordination and other meetings and at handover, and additionally whenever required by the contracting authority or the contracting authority's representative for the purpose of ensuring the smooth and proper execution of the contractual works. Should the contractor violate its contractual obligation hereunder (e.g. absence of the required personnel despite the contracting authority's request for their presence), the contracting authority shall be entitled to charge a contractual penalty in the amount of EUR 1,000 per person for each violation. The total amount of contractual penalties under this provision may not exceed EUR 300,000.00. Should the contractor fail to pay the contractual penalty by the set deadline, the contracting authority may liquidate the performance bond;
- for materials, equipment, appliances, and executed works, the contractor shall, prior to installation, submit to the contracting authority the prescribed test certificates, declarations of performance, and certificates, and/or carry out the prescribed tests and commissioning;
- the contractor undertakes to install only first-class, new materials and equipment of the quality specified in the project documentation; otherwise, it will immediately remove any unsuitable material and/or rectify any unsatisfactory work in a manner that complies with professional standards, at its own expense;
- the contractor must set up a closed and covered space for the inspection of all key materials to be installed in the building based on approved material samples, no later than by the submission of the first samples; the samples must be on a 1:1 scale and must remain on the construction site until completion of construction;
- the contractor must ensure that, prior to ordering materials and all visible and serial elements specified in the design or otherwise required, and no later than 60 days before installation, it submits samples thereof with all required characteristics (colour, size, etc.) to the designer, the supervising engineer, and the contracting authority for review and approval, including all supporting documentation; the samples shall be approved by the contracting authority based on the opinion of the designer and/or the supervising engineer, irrespective of any differing provisions or wording in the tender documentation, designs, or bills of quantities; all samples must be approved at least 12 months prior to the deadline for the completion of the contractual works; if the contractor breaches its contractual obligation under this point, the contracting authority shall be entitled to charge a contractual penalty in the amount of EUR 1,000 for each breach. The total amount of contractual penalties hereunder may not exceed EUR 500,000. Should the contractor

fail to pay the contractual penalty by the set deadline, the contracting authority may liquidate the performance bond;

- the contractor shall provide a 1:1 scale erected façade mock-up on a section of the building. The mock-up shall be approved by the contracting authority based on the opinion of the designer and/or the supervising engineer, irrespective of any differing provisions or wording in the tender documentation, designs, or bills of quantities;
- the contractor undertakes to prepare a site organisation plan prior to the beginning of works and, upon the authorisation by the contracting authority, register the site with the competent inspectorate;
- the contractor undertakes to prepare technical specifications, mounting or workshop drawings and quality control programmes for monitoring the quality of the materials used and the execution of the works covered by this contract in a timely manner. The contractor must submit the above-mentioned documentation to the contracting authority for approval no later than 30 days before the start of individual works. The approved documentation must be submitted to the construction site at least 6 days prior to the start of individual works. The documentation shall be prepared by the contractor's specialised technical services under the supervision of the quality assurance manager;
- the contractor undertakes to facilitate, at the contracting authority's request, the performance of an external quality control by providing all necessary information, access to documentation and cooperation required for such control;
- the contractor must provide a sustainable construction certification coordinator under the DGNB system;
- the contractor must ensure sustainable construction to enable the acquisition of a gold certificate under the DGNB sustainable construction certification system (the registration fee will be paid by the contracting authority);
- the contractor must prepare and submit the documentation and information required to obtain a sustainable construction certificate under the DGNB system;
- the contractor must ensure construction monitoring using a BIM approach;
- together with all key construction participants on the contractor's side, the contractor undertakes, within 20 days of the contracting authority's written notification referred to in the first paragraph of Article 3 of this contract, to prepare the contractor's BIM Execution Plan (BEP) and deliver it to the contracting authority for review and approval;
- the contractor undertakes to provide a BIM coordinator who will lead the implementation of the BIM approach during the building construction phase in the BIM environment (BIM 3D);
- the contractor undertakes to use the Common Data Environment (CDE), provided by the contracting authority, for the handover and exchange of all project-related documents,

not only BIM models, regularly update and monitor it, manage it, enter changes, enter implementation data, supporting evidence, and enter data for the PID and NOV DZO.

- the contractor undertakes to use the Common Data Environment (CDE) for the handover and exchange of all assets or elements specified in the OIR – *Organisational Information Requirements* document. It also undertakes to submit, in a timely and appropriate manner, the AIR – *Asset Information Requirements* document with pre-defined attributes (properties) for all the above-mentioned assets, which are necessary for the transition to management and maintenance within the Common Data Environment, and to notify the contracting authority in the event of any deficiencies. The handover of the required data shall be carried out in the agreed format / CDE – COBie module or Handover module, which shall be provided by the contracting authority;
- the contractor undertakes to produce BIM models each month (by the 5th day of the month for the previous month) and incorporate changes that have arisen during construction as a result of changed project solutions or replacement of materials or equipment. The contractor shall regularly record changes. The contractor shall deliver the BIM models of changes on a monthly basis in IFC formats. The delivered BIM models of changes must meet all BEP requirements and must be information-compatible with the BIM models of the PZI phase. Prior to handover to the contracting authority, the contractor must carry out an internal quality control in accordance with the BEP and submit a quality control report together with the models.
- the contractor must hand over documentation (technical description, calculations, diagrams, drawings) with any changes incorporated during construction arising as a result of modifications to design solutions or substitutions of materials or equipment, which serve as the basis for the preparation of the as-built documentation (PID). The contractor shall record the changes on an ongoing basis during construction or immediately upon their occurrence, and shall submit them monthly (by the 5th day of the month for the previous month) in DWG and PDF formats. Drawings must be generated directly from the BIM change models previously prepared by the GOI works contractor;
- the contractor must fulfil all other obligations relating to BIM in accordance with the Special Technical Conditions and the BEP BIM Implementation Plans, which define the requirements and protocols for the production, handover, approval and use of documentation and models, in the shared CDE environment provided by the contracting authority;
- the contractor undertakes to independently ensure that all necessary occupational health and safety, environmental protection and fire safety measures are in place and implemented during the performance of contractual works and assume full responsibility for the consequences of any failure to do so; it also undertakes to pay any resulting damage;
- the contractor must ensure safety on and around the construction site, with particular emphasis on the safety of workers and all passers-by, at its own expense;

- the contractor undertakes to protect the neighbouring existing buildings, objects, the surroundings and persons from damage and destruction at its own expense; it must also protect the existing utility networks, infrastructure, communication and other equipment, and pay any damage caused;
- the contractor must take into account the higher-quality solution in the event of any inconsistencies in the technical specifications (e.g. between the bill of quantities and the PZI graphic documentation), subject to the prior approval of the designer, the supervisor and the contracting authority;
- apply the same payment terms for settling obligations to its suppliers of goods, subcontractors and partners as those specified in the contract with the contracting authority for the public contract;
- the contractor undertakes to acknowledge, invoice and pay its suppliers, subcontractors and partners all outstanding liabilities in accordance with the invoices issued for services provided by subcontractors and partners or for goods supplied by suppliers in line with the inflows under the general contract;
- the contractor undertakes to hand over to the contracting authority a clean site that can be put into use immediately;
- the contractor undertakes to dispose of any debris and waste generated during the works at designated landfills, providing appropriate certificates as evidence, in accordance with the applicable regulations, which shall be submitted to the contracting authority;
- the contractor must cooperate with the contracting authority's authorised representative during the performance and until the completion of all works under this contract;
- the contractor undertakes not to replace any subcontractor without the contracting authority's prior written consent and provided that the new subcontractor meets the conditions for subcontractors set out in the tender documentation. The contractor shall propose the replacement by means of a written application, attaching all evidence that the subcontractor meets the tender conditions for subcontractors;
- the contractor must regularly keep a construction log for the GOI works as the basis for invoicing the works performed, i.e. for determining the stage of work completion;
- the contractor undertakes that monthly interim statements shall contain details of the quantities and prices of the works performed, the total value of such works, the amounts previously paid and the amount to be paid on the basis of the issued statement;
- the contractor undertakes to submit a report on the works performed for the previous month and all graphic materials relating to them, prior to the issue of the monthly interim statement;
- the contractor undertakes, prior to the issuance of the monthly interim payment certificate and no later than the 25th day of the month, to hand over the measurement

book regarding the works executed for the current month to the supervising engineer for review. The supervising engineer shall review the measurement book and forward it, certified, to the contractor, which shall, on the basis of the verified quantities in the measurement book, issue an invoice for the monthly interim payment certificate no later than the 5th day of the following month;

- the contractor undertakes to supply and erect the site signboard in accordance with the applicable building legislation;
- the contractor undertakes to hand over to the contracting authority a copy of all documents required for obtaining the use permit no later than 4 weeks prior to the scheduled technical inspection;
- the contractor must, in accordance with the provisions of Article 3 of this contract and upon authorisation by the contracting authority, submit an application for conducting the technical inspection and obtaining the use permit;
- the contractor undertakes to attend the technical inspection and, upon request of the technical inspection commission, supplement at its own expense the documentation previously submitted upon handover of the contractual works, failing which the contracting authority may call upon the performance bond;
- the contractor must protect the trade secrets of the contracting authority and its business partners, as well as the confidentiality of all technical documents, technological processes and other information;
- the contractor undertakes that the construction manager, acting as site manager, shall coordinate and align the works with all contractors on the investment project and attend every inspection of executed works with the supervising engineer as well as all necessary measurements;
- the contractor shall, during the execution of the Works, ensure the engagement of a specialist responsible for the coordinated operation and integration of the mechanical and electrical installations and the Central Management System (CMS) (System Integrator).
- the contractor must actively cooperate and coordinate work with all parties involved in the project, especially contractors, subcontractors and all other participants engaged by the contracting authority within the scope of this contract or in connection with the construction of the new UL FFA building – Phase 1, the new UL FS building, the execution of the shared access and landscaping project for the UL FS and FFA areas, the execution of the project to relocate the S1000 gas pipeline in the OPPN65 area – Biotechnical Centre, the implementation of the project for the expansion of the public section of the DN150 water supply system for the connection of UL FS and UL FFA, and the implementation of the project for the redesign of the 20 kV MV cable loop RTP13 Vič 110/20 kV (J17) – (J09) in the area of the Faculty of Mechanical Engineering and the Faculty of Pharmacy, including all other contractors on the site

(MOL, JP VOKA SNAGA, ELEKTRO Ljubljana, ENERGETIKA LJUBLJANA,...) (hereinafter also: project contractors), all up to the completion of works under this contract, including during the technical inspection phase of the building and the obtaining of the operating permit;

- the contractor undertakes to facilitate the continuous work by other project contractors (e.g. contractors and suppliers of furniture, technological, laboratory, research and kitchen equipment), as selected by the contracting authority, while organising the works in such a way that other contractors are introduced to the works in a timely manner; it shall also be obliged to ensure timely preparation of the site and appropriate conditions for their work (such as preparations for clean rooms, preparations for the delivery of equipment);
- the contractor undertakes that the appointed construction manager, acting as site manager, who is actively proficient in the Slovenian language, shall, until the completion of the works under this contract, align, actively cooperate, and coordinate the works with all contractors on the project, and attend every inspection of executed works with the supervising engineer, as well as the necessary measurements, regular meetings, and weekly coordination meetings, all for the purpose of the timely completion and proper functionality of the building as a whole;
- the contractor undertakes that, in the event that the contractor's representative or its management personnel are not fluent in the Slovenian language, it shall ensure that an interpreter is available throughout all working hours. Should the contractor violate its contractual obligation hereunder, the contracting authority shall be entitled to charge a contractual penalty of EUR 1,000 for each violation. The total amount of contractual penalties hereunder may not exceed EUR 100,000. Should the contractor fail to pay the contractual penalty by the set deadline, the contracting authority may liquidate the performance bond;
- the contractor must ensure continuous use of and educational activities in nearby buildings, and make sure that any works causing loud noise are agreed in advance in consultation with the contracting authority;
- the contractor must be responsible for the overall monitoring and coordination of the project;
- the contractor undertakes to ensure that the GOI works are compatible with the works of other suppliers and contractors engaged by the contracting authority on this project;
- the contractor undertakes to provide a training programme for the building manager and ensure that the building manager is trained for all systems;
- the contractor undertakes to conduct training for maintenance personnel and the building operator on the energy-efficient use of the building, in accordance with the guidelines of the DGNB-certified sustainable building system;

- the contractor undertakes to keep all records and documents required by regulations in a transparent manner and ensure that documents are recorded and stored in a way that provides the appropriate audit trail;
- the contractor undertakes to mark all prepared documentation with the logos provided by the contracting authority.

Article 10

The contractor is obliged to provide quality management services, which include quality planning, quality assurance and quality control. This involves planned programming (preparation of a programme and implementation of the planned quality control of installed materials, equipment and construction products, as well as the execution of works: types and number of necessary inspections, investigations, evidence, etc.) to ensure the prescribed quality and compliance with the essential characteristics prescribed by law throughout the entire service life of the structure.

The contractor shall be obliged to ensure quality management and quality control in accordance with the quality management system and to appoint a professionally qualified quality assurance manager to perform the following tasks:

- responsibility for coordinating and carrying out all necessary activities to ensure regular and ongoing quality assurance until the completion of construction, acquisition of operating permits and successful handover and acceptance;
- responsibility for coordinating and leading the project team to carry out regular quality control of installed materials and the execution of works – internal control by the contractor in charge for the entire duration of the works until the completion of construction, acquisition of operating permits and successful handover and acceptance;
- the site manager and the quality assurance manager are the persons responsible for regular assurance and continuous achievement of the prescribed quality of installed materials, equipment and construction products, as well as the execution of all works throughout the entire duration of the project until the completion of construction, the issue of operating permits and successful handover and acceptance;
- responsibility for appointing and coordinating specialised staff to carry out regular quality control of installed materials, equipment and construction products, as well as the works performed, for each individual type of the GOI works;
- organisation of regular and continuous implementation of all activities to ensure the quality of installed materials, equipment and construction products, as well as the execution of works, including the performance of prescribed quality control: timely preparation of technical specifications (TS) (TS must be submitted for approval 30 days prior to the beginning of works; approved specifications must be delivered to the construction site at least 7 days before the beginning of individual works), implementation of quality assurance and control in accordance with the approved TS and the quality control plan (approved frequency and methods of inspection, measurements, evidence, etc.), preparation and control of regular weekly records and monthly reports on the implementation of

quality control of installed materials, equipment and construction products, as well as the works carried out and the prescribed quality achieved; drafting of final reports on the quality achieved for each individual type of works, etc.

- immediate suspension of specific works in the event of failure to achieve the prescribed and appropriate quality, and immediate preparation of problem reports (findings reports) and measures to rectify all identified deficiencies and defects;
- responsibility for ensuring the quality of installed materials, equipment and construction products, as well as the works performed by subcontractors and other contractors on the construction site in the same scope and under the same conditions and requirements; own quality assurance and control of subcontractors and other contractors, as well as suppliers of materials, equipment and construction products intended for installation;
- coordination and regular cooperation with the contracting authority's authorised representatives in the field of quality assurance and control.

Article 11

During the performance of works hereunder, the contractor shall be obliged to keep the construction site and the building clean on a daily basis and to remove all unnecessary material at its own expense and in accordance with the applicable regulations on the management of waste generated during construction works. Upon the completion of works, the contractor must leave the building and its surroundings clean and tidy. Otherwise, the contracting authority may do so at the contractor's expense without prior notice.

The contracting authority hereby authorises the contractor in accordance with the decree regulating the management of waste generated during construction works to hand over the resulting construction waste to a collector or processor of construction waste and keep and complete the site records on behalf of the contracting authority.

Article 12

The contracting authority undertakes:

- to make available to the contractor all documentation and information at its disposal that is necessary for the scope of works to be performed;
- to cooperate with the contractor in order to ensure that the works are performed in a timely manner;
- to keep the contractor informed of any changes and new circumstances that could affect the performance of the works;
- to settle payment obligations arising from the contract.

VII. GUARANTEE FOR THE QUALITY OF WORKS AND PRODUCTS

Article 13

The contractor hereby provides the following guarantees:

- a) warranty period for construction soundness, in particular for structural strength, safety, waterproofing, façade and roof: **10 years**,
- b) warranty period for faults in the universal wiring: **10 years**,
- c) warranty period for defects in mechanical installations distribution systems (gas, sewerage, water supply, heating and cooling): **10 years**,
- d) warranty period for other equipment and devices, including air handling units: **3 years**,
- e) the warranty period for all other defects in the works is **5 years**;

upon successful handover of the works.

The date of commencement of the warranty, which must be made out to the contracting authority, shall be the date of handover.

Any hidden defects shall be dealt with in accordance with the provisions of the Code of Obligations. A new warranty period shall start for any replaced parts during the warranty period on the date of replacement.

Article 13a

During the first heating season, the contracting authority shall commission an authorised body to carry out a thermographic survey of all buildings constructed under this contract. In the event that the thermographic survey identifies “thermal bridges” or any other defects for which the contractor is responsible, the contracting authority shall notify the contractor in writing of the identified defects and provide it with the thermographic survey report.

The contractor shall rectify all identified defects and deficiencies at its own expense within 6 months of receipt of the written notice and the thermographic survey report.

If the contractor fails to rectify the identified defects and deficiencies within the specified period, the contracting authority shall be entitled to draw on the guarantee for the rectification of defects during the warranty period.

Article 14

If a defect is found during the warranty period, the contractor must remedy it at its own expense within a reasonably agreed timeframe after the contracting authority has notified it of the defect. The time taken to rectify the defect shall in no case exceed five working days from the date of reporting

it, unless the contracting authority establishes that this period is not suitable or proportionate given the nature of the defect and the complexity involved in rectifying it, and therefore approves a longer period for rectification.

If the contractor fails to rectify the defect within the timeframe specified in the previous paragraph, the contracting authority will hire another contractor to rectify the defect at the expense of the contractor hereunder (acting with due diligence). In such case, the contracting authority will charge the contractor a 5% surcharge on the value of such works to cover its administrative costs. Should the contractor fail to cover the costs of rectifying the defects, the contracting authority may liquidate the financial security for the rectification of defects during the warranty period to cover such costs.

Article 14.a

The contracting authority may liquidate the performance bond if:

- the contractor fails to start fulfilling its contractual obligations within the timeframe and in accordance with the provisions of the contract,
- the contractor ceases to fulfil its contractual obligations in accordance with the provisions of the contract,
- the contractor fails to fulfil its contractual obligations in the agreed quality, scope or within the agreed timeframe (i.e. grounds for non-performance, late performance or inadequate performance),
- the contractor causes damage to the contracting authority which is not compensated within 8 days of the latter's request,
- the contractor fails provide a warranty bond to the contracting authority in a timely manner,
- this is stipulated in other articles of this contract.

The contracting authority may also liquidate the performance bond if it withdraws from the contract for another justified reason arising from the contractor's sphere of influence, or if the contractor withdraws from the contract without a justified reason arising from the contracting authority's sphere of influence.

The contracting authority may liquidate the warranty bond if:

- the contractor fails to rectify all notified defects in full, appropriately and within the specified timeframe and/or fails to supply and install the appropriate spare parts as specified herein during the warranty period,
- the service provided does not possess the properties, characteristics, quality or certifications to which the contractor has committed, or which it ought to possess in accordance with its nature,
- the contractor fails to provide the contracting authority, at the latter's request, a new or amended warranty bond,
- this is stipulated in other articles of this contract.

VIII. HANDOVER AND ACCEPTANCE OF COMPLETED WORKS

Article 15

The handover of the contract works shall be carried out by the authorised representatives of the contracting authority and the contractor no later than the deadline specified in the first paragraph of Article 3 of the contract.

Conditions that must be cumulatively met for a successful handover and acceptance:

- the contractor has completed all the works agreed in the contract,
- the contractor has entered all the parameters and data required for the transition to management in the Common Data Environment (CDE) and the BIM,
- the contractor has submitted the building manager training programme and the building manager has been trained on all the systems,
- the contractor has carried out the training of the building manager on the energy-efficient use of the building, in accordance with the instructions of the DGNB-certified sustainable building system
- the contractor has handed over all necessary documentation to the contracting authority, including the maintenance and operating instructions,
- the contractor has submitted the certificate of building reliability to the contracting authority,
- the contractor has handed over to the contracting authority all warranty certificates for the installed equipment and devices,
- the contracting authority has obtained an operating permit for the works carried out on the basis of a building permit.

The contracting authority and the contractor shall confirm the handover and acceptance by signing the handover report. The conditions for proceeding with the preparation of the final statement for the works carried out shall thus be met. The final account shall be prepared within 30 days of the signing of the handover record.

The contractor shall issue the final invoice on the basis of the agreed and signed final account of the executed works and upon submission of the warranty bond.

Prior to the expiry of each of the warranty periods referred to in Article 13 hereof, the contracting parties shall carry out an inspection of any outstanding defects or deficiencies. In the event of identified defects or deficiencies, the contracting authority shall have the right to require an extension of the validity of the financial security for the rectification of defects during the warranty period, namely for the full value of the financial security subject to extension and for an additional required period of not less than 1 year. If the contractor fails to submit an appropriate extension of the financial security, the contracting authority may call on the bank or insurance guarantee for the rectification of defects during the warranty period for its full value.

IX. CONTRACTUAL PENALTY

Article 16

If the Contractor fails to meet any critical deadlines, interim milestones and/or any other obligations under this Contract, and/or if the Contract Works are completed and handed over late due to reasons attributable to the Contractor, the Contracting Authority shall be entitled to charge the Contractor liquidated damages in the amount of 1.5‰ (one point five per mille) of the estimated value of the Contract Works (including VAT) for each day of delay.

The aggregate amount of liquidated damages payable under this provision shall not exceed 10% (ten per cent) of the estimated value of the Contract Works, including VAT, referred to in Article 4 of this Contract. The contracting authority may withhold the amount of the contractual penalty referred to in the preceding paragraph from the payment of an individual invoice.

Should the contracting authority incur costs and damages exceeding the contractual penalty due to the contractor's delay for which the contractor is responsible, the contractor shall be obliged to pay all costs incurred and the full amount of the damage in addition to the contractual penalty. The contracting authority may also liquidate the financial performance bond to recover the contractual penalty, the costs and damages incurred. Furthermore, the contracting authority may recover the contractual penalty from the funds withheld in accordance with this contract.

X. REPRESENTATIVES UNDER THE CONTRACT

Article 17

The contracting parties agree that the construction manager, the authorised mechanical engineer and the authorised electrical engineer may not perform other functions/roles under this contract, while the other personnel listed below may perform a maximum of two functions/roles under this contract.

The authorised representatives of the contracting authority under this contract are:

The contracting authority's professional supervisor under this contract shall be

_____.

The contractor's authorised representative under this contract shall be

_____.

The construction manager, who is also the site manager, under this contract is

_____.

The authorised engineer/works manager in the field of civil engineering is

_____.

The authorised engineer/works manager in the field of mechanical engineering is

_____.

The authorised engineer/works manager in the field of electrical engineering is

_____.

The System Integrator is

_____.

The coordinator for DGNB sustainable building certification is

_____.

The BIM coordinator is _____.

The quality assurance manager shall be _____.

The person responsible for ICT installations is _____.

The person responsible for control automation is _____.

The person responsible for implementing the containment of vibration transmission to the contracting authority's equipment is

_____.

The contractor shall notify the contracting authority of any replacement of the authorised representative under this contract.

XI. SUBCONTRACTORS

(Note: The provisions in Section XI apply only if the contractor uses subcontractors)

Article 18

Should the subcontractor request direct payment, the contractor authorises the contracting authority, and the contracting authority accepts this authorisation, to pay the subcontractors directly on the basis of a confirmed invoice or statement.

The subcontractor agrees that the contracting authority shall pay the subcontractor's receivables hereunder due from the supplier directly to the subcontractor.

If the subcontractor does not request direct payment, the contracting authority shall require the principal contractor to send it, no later than 60 days after payment of the final invoice, a written statement from the contractor and a written statement from the subcontractor confirming that the subcontractor has received payment for the work performed directly related to the subject matter of the public contract.

If a subcontractor is replaced after the contract has been signed, or if the contractor engages a new subcontractor, the contractor must submit the following to the contracting authority within 5 days of the change: a statement that it has settled all undisputed obligations to the original subcontractor, a request from the new subcontractor for direct payment, if relevant, and an authorisation for payment for the works performed and accepted or the supplies to be made directly to the new subcontractor, if so requested.

The contractor may demonstrate compliance with the required conditions (e.g. references) using subcontractors. In such case, the subcontractor must submit its own references, and the same subcontractor will have to carry out the works under the public contract to which the references relate.

If the contractor replaces a subcontractor whose reference was submitted with the tender, the contractor must submit an equivalent reference for the new subcontractor for the same type of work as the reference submitted for the replaced subcontractor at the time of tender submission and the new subcontractor must be registered as subcontractor for works of the same type as those specified in such new reference.

Article 19

If a subcontractor requests direct payment, the contracting authority shall pay the subcontractor for the work performed after the contractor has approved and submitted the subcontractor's statement or invoice. If the contractor fails to approve the subcontractor's statement or invoice, it shall be deemed to have approved the subcontractor's statement or invoice for the work performed by the subcontractor once such work has been approved by the contracting authority's professional supervisor.

If the subcontractor's invoice or statement is only partially confirmed by the principal contractor or the professional supervisor, the contracting authority shall pay the undisputed portion of the subcontractor's statement or invoice to the subcontractor within the agreed payment deadlines.

XII. OTHER PROVISIONS

Article 20

If the contractor:

- goes bankrupt or becomes insolvent, if a court order for the payment of debts is issued against it, if it is in compulsory settlement, if, as a legal entity, it has passed a resolution on the dissolution of the company (except for voluntary liquidation due to a merger or restructuring), if a liquidator is appointed, or if the contractor initiates a similar action or if such action is brought against them due to debt, or
- fails to begin the contractually agreed works by the contractual deadline, or within any subsequent period set by the contracting authority;
- fails to achieve the contractually agreed quality and fails to rectify such situation even within a subsequent period set by the contracting authority;
- suspends the works without the contracting authority's written consent;
- misses critical milestone deadlines and fails to make up for such delays even within a subsequent period set by the contracting authority;
- violates the provisions of Article 9 hereof;

the contracting authority may also withdraw from this contract. In such case, the contractor shall be obliged to pay a contractual penalty amounting to 10% of the estimated contract value (including VAT) as well as any damages. Should the contractor fail to pay the contractual penalty and damages, the contracting authority shall be entitled to liquidate the performance bond/warranty bond in order to recover the contractual penalty. Furthermore, the contracting authority may recover the contractual penalty from the funds withheld in accordance with this contract.

The contracting authority and the contractor agree that the right to charge a contractual penalty is not conditional upon damage being incurred by the contracting authority. The contracting authority shall claim compensation for damages according to the general principles of liability for damages, independently of whether a contractual penalty is invoked.

Article 21

In the event that a need for additional works arises, the contractor shall execute them without objection, immediately and without delay, upon a unilateral declaration or request by the contracting authority, at the tender prices on the basis of which this contract was concluded, taking into account the discount shown in the tender, and within the deadlines customary for this type of works. In the case referred to in the preceding sentence (i.e. when the contractor's cost estimate submitted with the tender shows the price for additional works), the contractor shall not be entitled to refuse the performance of additional works or to suspend works on the building due to a request for the performance of additional works.

The contractor shall be obliged to submit an offer for the additional works referred to in the preceding paragraph of this Article within three days of a request from the contracting authority compiled in accordance with the provisions of the preceding paragraph (i.e. at the prices set out in the

contractor's cost estimate submitted with the tender, taking into account any discount shown in the tender).

If the price from the contractor's cost estimate submitted in the tender is not specified for individual additional works, the contractor shall send the contracting authority for its approval, within three days of receiving the contracting authority's request for additional works, an offer for the performance of those additional works, where the contractor must, when compiling the offer, take into account the price list of cost elements referred to in Article 4a of this contract and any discount shown in the tender. If it is not possible to determine prices for additional works on the basis of the price list of cost elements as stated in the preceding sentence, the contractor shall compile an offer that corresponds to the value of the work, the usual time and the usual payment for such type of work.

An annex to the contract shall be concluded for all additional works.

Any additional works relating to the subject matter hereof shall be regulated by the procedures in accordance with the Public Procurement Act.

Article 22

The contractor shall not, without prior written consent of the contracting authority, transfer the contract or any part thereof, or any rights, benefits, obligations or interests arising from or under the contract, to a third party.

Article 23

Any contract in which a person promises, offers or gives any undue advantage to the representative or agent of a public sector agency or organisation on behalf or for the account of another contracting party for the purpose of:

- obtaining business, or
- concluding business under more favourable terms and conditions, or
- omitting due oversight of the performance of contractual obligations, or
- engaging in other actions or omissions whereby harm is caused to the public sector authority or organisation or that enable the obtaining of illicit benefit for the representative or agent of the public sector authority or organisation, for the other contracting party or for its representative, statutory representative or agent,

shall be deemed to be null and void.

Article 24

The contract shall cease to be valid if the contracting authority becomes aware that a court has found a breach of the obligations set out in the second paragraph of Article 3 of the Public Procurement Act (ZJN-3) by the contractor or its subcontractor by a final judgment or if the contracting authority becomes aware that the competent state authority has found at least two breaches concerning payment for work, working hours, rest periods, performance of work under civil law contracts despite the existence of the elements of employment relationship or undeclared employment, for which a

fine for a minor offence has been imposed on them by one or several final decisions. If the contracting authority becomes aware of a breach, it must notify the contractor thereof within ten days. The contractor may submit evidence that it has taken sufficient measures that prove its reliability despite the existence of the breaches by a deadline set by the contracting authority, which may not be longer than 15 days. If a breach is committed by a subcontractor, the contractor may, by the same deadline, submit proof that the subcontractor has taken sufficient measures that prove its reliability despite the existence of the breaches. Should the contractor fail to supply proof for the subcontractor, or should it do so but the contracting authority assesses that the measures are insufficient, the contractor may replace the subcontractor by a deadline set by the contracting authority, which may be no longer than 15 days, in accordance with Article 94 of the ZJN-3, or may take over the works that it assigned to the subcontractor itself, as long as replacement or takeover does not entail a significant modification to the contract. Should the contractor fail to supply proof for itself or for a subcontractor, or should it do so but the contracting authority assesses that the measures are insufficient, or should the contractor not take over the works itself or propose a new subcontractor, or should the contracting authority reject a new subcontractor proposed on time in accordance with Article 94 of the ZJN-3, the condition subsequent shall come into effect provided that at least six months remain between the contracting authority learning of the breach and the expiry of the contract. Without prejudice to the preceding sentence, the contract shall not be terminated if termination would cause the contracting authority to incur disproportionate costs or suffer significant problems in ensuring the smooth performance of works or a significant delay, on condition that the contracting authority informs the contractor, no later than within 20 days of learning about the breach, that the contract is not to be terminated.

In the event of the condition subsequent being met, this contract shall be deemed to have been rescinded on the day that a new contract for performance of the public contract is concluded. The contracting authority shall then initiate a new contract award procedure without delay, within 60 days of learning of the breach. Should the contracting authority fail to initiate a new contract award procedure by this deadline, the contract shall be deemed to have been rescinded on the sixtieth day after the contracting authority learned of the breach.

Article 25

The contracting parties agree that any disagreements or disputes shall primarily be resolved by mutual agreement; should this fail, the competent court in Ljubljana shall decide on the disputes.

Article 26

Special construction practices shall apply provided they are not contrary to the provisions of this contract.

Article 27

This contract shall enter into force on the date it is signed by both contracting parties and subject to the condition precedent that the contractor provides a performance bond.

Any amendments or supplements to this contract shall only be valid in the form of a written annex hereto.

The contract is drawn up in two copies, of which each contracting party shall receive one. The contract is drawn up in the form of an electronic document, which shall be electronically signed by all signatories using a secure electronic signature, and each signatory shall receive an identical copy of the signed electronic document.

Annexes:

- Tender No. dated (including cost estimate)
- performance bond
- insurance policy
- statement of the tenderer's ownership structure
