ST Engineering

ST Engineering Telematics Wireless

October 2026

Our Solutions Evolution

ST Engineering

1996–2008 MOBILITY & IDENTIFICATION

2008–2026 UTILITIES & SMART CITIES

Terrestrial RF Location

- Stolen vehicle recovery
- Asset & cargo tracking
- Personal location
- Fleet management

2M+ million location devices

1996

Founded as a spin-off from Tadiran Systems and Communication

RF Identification (RFID) / AVI

- Electronic Toll Collection (ETC)
- Commercial Vehicle Operations (CVO)

15M+ RFID transponders

2008

Acquired by ST Engineering (STE:SP)

Automatic Meter Reading / Advanced Metering Infrastructure (AMI/AMR)

- Water, Gas
- Electric power/Smart Grid

1.7M+ radio modules

Smart City Light Networks

- Street Light Control
- Water Resource Management
- Sensors

1M+ deployed nodes

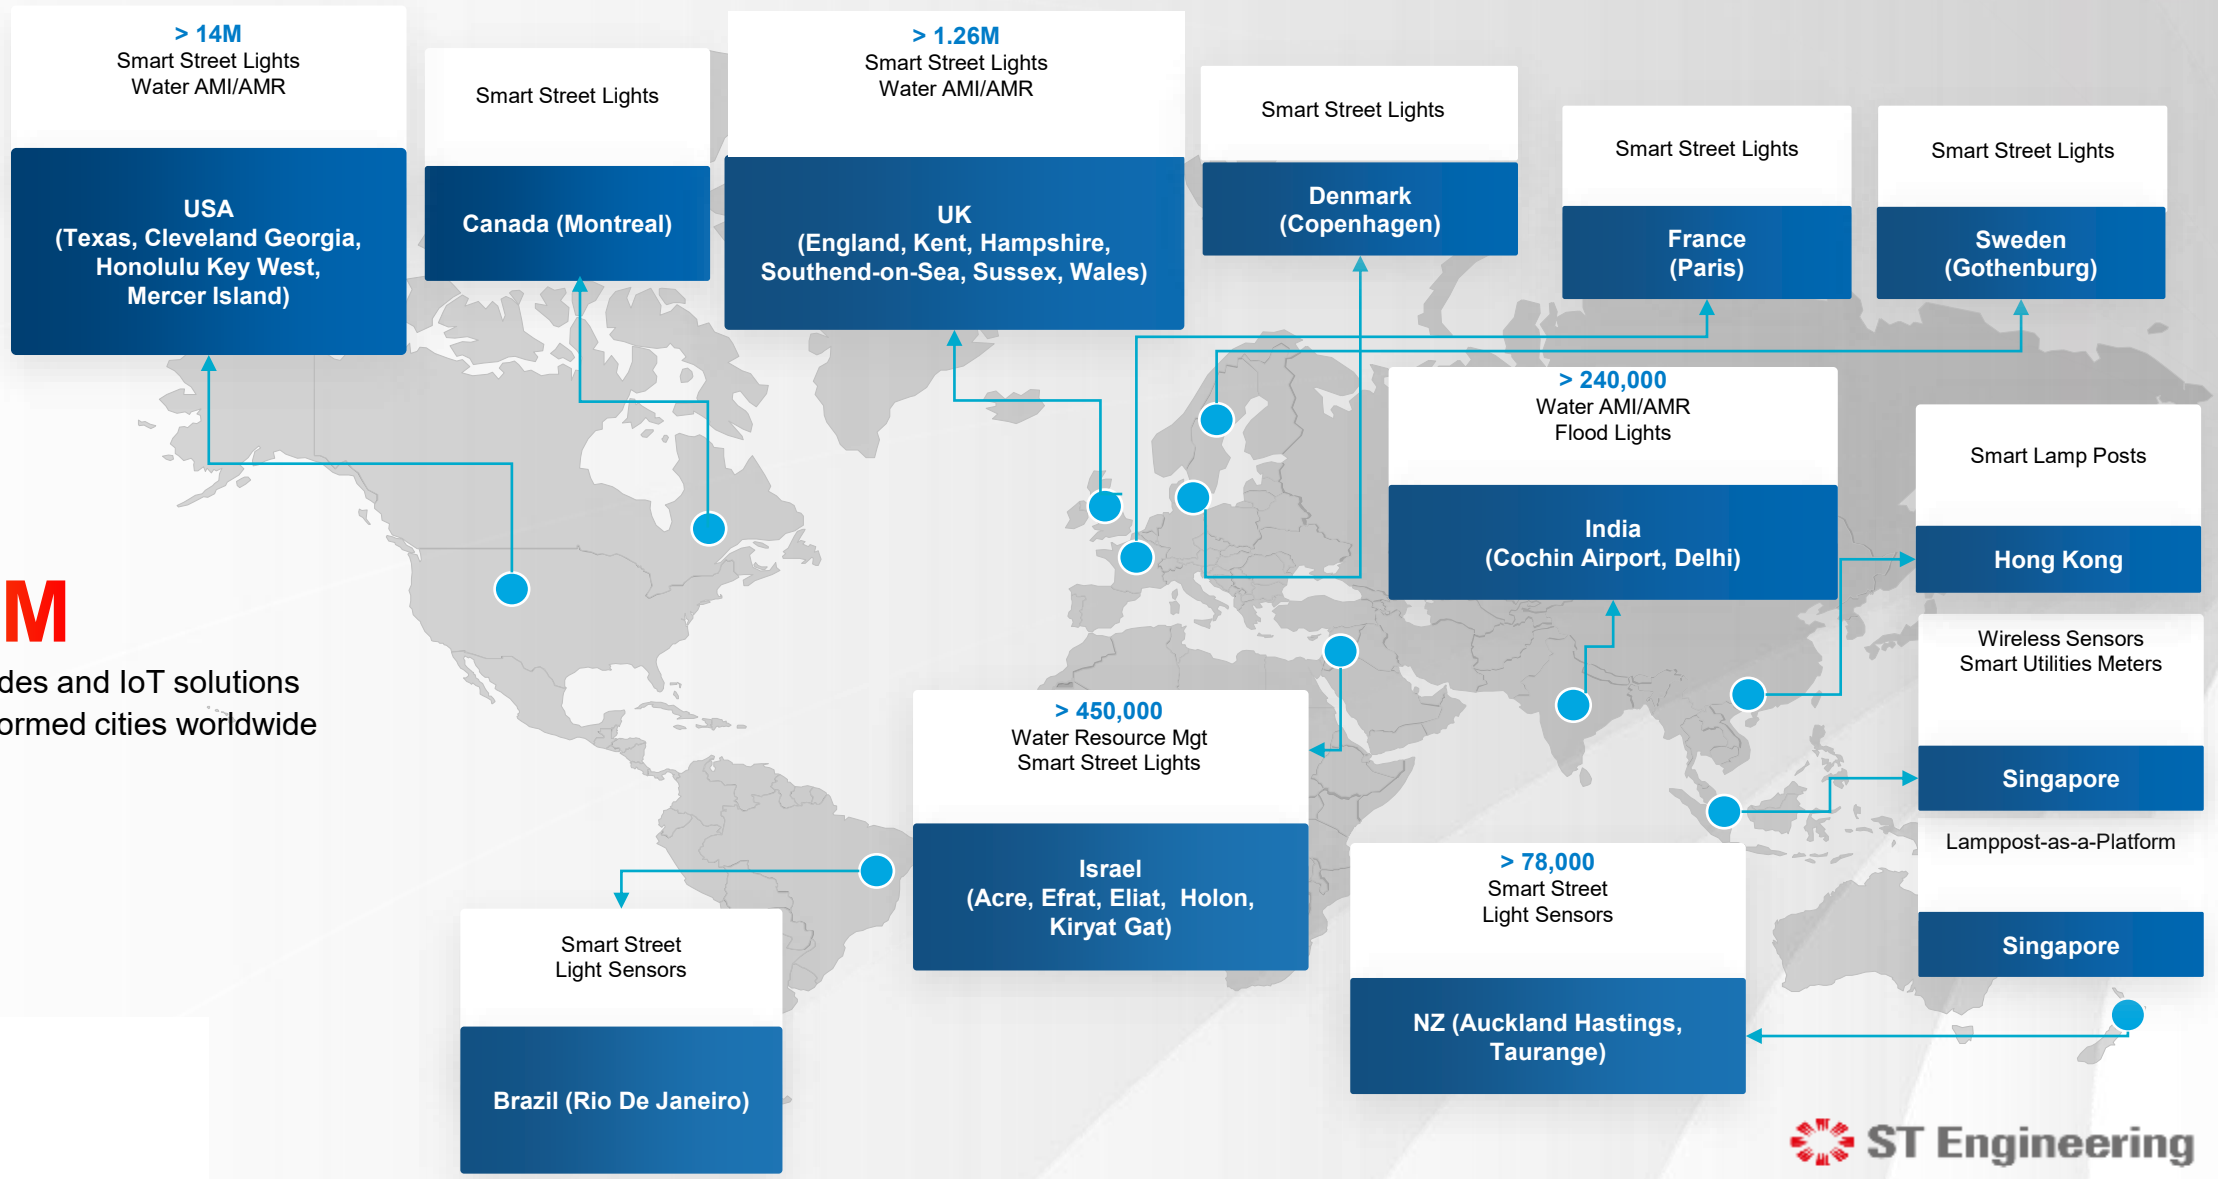

2026

20M+ wireless AMI/AMR devices deployed

SW solution for Central Control Management for multiple systems

BrightCity™ Telematics Wireless

Smart City Record

> 20M

wireless nodes and IoT solutions have transformed cities worldwide

3 Communication Technologies. 1 BrightCity Platform.

ST Engineering

Flexible connectivity for smarter cities.

Galaxy
(Licensed-band RF)

Private network solution at urban scale

- Private and secured network
- Licensed spectrum
- Direct and repeater-assisted connectivity
- Ideal for complex urban environments

LoRaWAN
(Open Standard)

Flexible and scalable solution

- Standards-based connectivity
- Flexible for new or existing assets
- Compatibility with a wide range of IoT sensors
- Scalable solution

NB-IoT / LTE-M
(Cellular)

Wide-area coverage solution

- Extended coverage
- Utilizes mobile operator infrastructure
- No dedicated Telematics gateway
- Ideal for any location setup

BrightCity™
Unified Management Platform

CMS
Smart Street Lighting

WRM
Water Resource Management

MDMS
Meter Data Management

Monitor | Analyze | Manage | Integrate

BrightCity™ Telematics Wireless

A Single Platform. Multiple Applications.

ST Engineering

We connect field teams with customer services and the business environment through a unified platform.

Field Teams

Operational Efficiency in Real-time

Installation and Commissioning Tool
Rapid and Secure Setup

Drive-By / AMR Application
Automated Data Collection

Work Order Creator
Planning, Allocation and Tracking

BrightCity™

Unified Urban Intelligence Platform

CMS	WRM	MDMS
Smart Street Lighting	Water Resource Management	Meter Data Management

From data to brighter outcomes

Customers and Business Environment

Better Service. Higher Value.

Customer Portal
Easy Access to Information and Services

Billing Integration and Output
Data Export and Integration

Mobile Alert Notifications
Real-time Alerts

AI-Enabled Personal Insights
Advanced Analysis and Recommendations
