

VILLA MELNIK

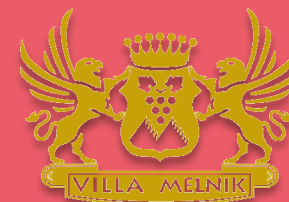

Boutique Family Winery

Villa Melnik specializes in indigenous grape varieties such as Melnik and Mavrud. In addition to award-winning reds, whites and roses, the winery also produces orange wines and noble sweet wines from late harvested grapes.

The winery's architecture enables a "gravity-flow" production process, which means both energy-efficiency and a minimal-intervention, gentle approach to winemaking.

Visitors can take guided tours of the vineyards and observe all stages of the production process as they walk through the three levels of the winery. Guests can descend into the underground cellars deep into the sandy hill, where the bottles and barrels age under the sounds of music. The tour culminates in the tasting room where wine lovers can indulge in Villa Melnik wines paired with local delicacies.

Our wines

Villa Melnik's roots are in the Melnik region – of the vines and of the family. It is the founders' mission to preserve and revive the rare Melnik varieties – Broad-leaved Melnik, Melnik 55, Melnik Jubilee 1300, Ruen. The winery's portfolio includes:

- **Hailstorm** – a unique wine from the grapes that survived a devastating hailstorm
- **Orange Wine** – one of Bulgaria's most awarded skin-contact whites
- **Aplauz Reserve** – single varietal wines from hand-selected grapes, aged to perfection, with numerous awards from international contests
- **Bergule** – blends of local and international grapes with excellent balance between fruity and oaky aromas
- **Young & Wild** – fresh, juicy, fruity wines for the young at heart
